GRAIN MARKETS MIXED

Cash grain markets showed an irregular trend during the holiday-shortened week ended July 1. Most price changes, however, were generally not more than a couple of cents above or below the previous week.

Hard winter wheat closed 2¢ per bushel higher to 2¢ lower as a rule, but yellow hard was up 7-8¢ at Chicago. Red winter wheat ruled firm. Export interest was active and mill buying, although light, exceeded expectations and took the edge off selling pressure at some markets. Harvesting was practically over in Texas and nearing a peak in Kansas. Selling by farmers tapered off, reflecting resistance to recent weaker prices. Spring wheat held steady on the low end of the range but dropped 4-6¢ at the top end in Minneapolis. Durum prices were unchanged. Traders reported the adjustments to a new-crop basis appeared to be about completed. White wheat closed unchanged to 4¢ lower and hard wheat declined 2¢ in light trading in the Pacific Northwest. Rye went up 3¢ on light offerings in Minneapolis.

Corn markets were not much changed. Trading was light with offerings generally ample for current demand. Oats held firm supported by light offerings. Barley was generally unchanged with light offerings finding only fair demand. Grain sorghum edged up 1-3¢ per cwt. behind slightly improved demand.

Soybeans ruled firm, supported by fairly steady demand, a stronger meal market and light offerings. Some traders, however, expressed disappointment over the weekly export inspection figures which were sharply below a year earlier. Flaxseed held steady in Minneapolis.

	14% protein	1.79	-	-	-
Pacific Northwest	No. 2 Western White ..	1.60	-	-	1.07

1/ The export payment rate for wheat on July 1, was 17¢ per bushel for spring wheat from Duluth, 9¢ for red winter from Baltimore and hard winter from the Gulf, and 9¢ for soft white from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKETS SHOW MIXED TREND

Cash grain markets showed an irregular trend during the week ended July 9. Winter wheat advanced while corn prices were mostly lower. Other grains showed little change during the week.

Winter wheat prices went up 3-6¢ per bushel at most Midwest points in reflection of tight farm holding and reduced offerings. Domestic buyers were in the market for substantial amounts while export interest furnished good support. Harvest was mostly completed in Kansas and Eastern Nebraska. Rains delayed harvest in much of the Central red winter area. There was a good demand for limited offerings. Spring wheat prices were mostly unchanged with a very light demand for meager offerings. The grain handlers strike in Duluth was a dampening factor in the market. Durum prices declined 3¢ with receipts very light. Wheat prices in the Pacific Northwest declined 2-3¢ per bushel due to a further adjustment to a new crop basis. Rye prices fluctuated within narrow limits and closed unchanged at Minneapolis.

Corn markets weakened reflecting improved crop conditions in most of the area. Prices were generally 1-2¢ per bushel lower due in part to large receipts at many points. Oats were about unchanged with prices moving in rather narrow limits. Barley held steady in light trading. Grain sorghum prices advanced 2¢ per cwt. at Kansas City reflecting the light available stocks.

Soybean prices declined 1¢ per bushel due in part to improved crop conditions, increased acreage and continued unfavorable feeding ratios for soybean meal. Offerings remained light. Flaxseed held steady at Minneapolis.

Grains - CCC dispositions	20

1963-CROP CORN PRICE SUPPORT ACTIVITY ... shows an increase of 7.3 million bushels in the quantity put under support through June 15, according to a supplemental report. This brought the total from the 1963 crop to 395 million as against 590 million from the 1962 crop. Repayments on CCC corn loans as of June 15, 1964 totaled 69 million compared with repayments a year earlier of less than 9 million bushels.

SALE OF FLAXSEED AND PURCHASE OF LINSEED OIL ... by the Commodity Credit Corporation was extended to include the sale of an additional 1 million bushels of flaxseed and the concurrent purchase of a resultant quantity of linseed oil from the million bushels. The original program was announced May 1.

EXPORTS OF WHEAT AND FLOUR ... for the crop year ended June 30 totaled around 850 million bushels on the basis of Census data for 11 months and inspections for export for June. This is well above the previous record of 718 million exported in 1961-62 and the 637 million exported in 1962-63. These data do not include exports of bulgur wheat which may total around 10 million bushels in grain equivalent. This compares with 3.6 million bushels in grain equivalent exported in 1962-63. Preliminary tabulations of inspections for export indicate sharp increases in exports of all classes of wheat exported July through June 1963-64. Exports by classes last season in million bushels with comparable figures for 1962-63 in parentheses were as follows: Hard Red Spring 46.3 (25.2); Hard Red Winter 473.0 (343.0); Durum 27.9 (3.3); Soft Red Winter 72.6 (36.6); White 128.1 (113.5); Mixed 3.2 (12.4); total all classes 751.1 (534.0). (Details of wheat inspections by program, class and country of destination as well as other data will be published July 17).

Grains: Export prices basis prompt or 30-day shipment, July 9, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			--Dollars--		
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein.	1.79	1.26	-	0.95

	14% protein	1.79	-	-	-
Pacific Northwest	No. 2 Western White ...	1.58	-	-	1.07

^{1/} The export payment rate for wheat on July 9, was 18¢ per bushel for spring wheat from Duluth, 10¢ for red winter from Baltimore and hard winter from the Gulf, and 5¢ for soft white from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Corrected.

Volume 12 No. 29

Washington, D. C. 20250

July 17, 1964

GRAIN PRICES GENERALLY LOWER

Cash grain prices generally declined during the week ended July 16, reflecting in part favorable prospects for another large crop. Rye suffered the sharpest loss, with corn and winter wheat in a more gradual decline. Spring wheat was firm to slightly higher.

Winter wheat dropped 1-3¢ with offerings ample for the current light demand. Larger than expected estimates of the 1964 crop was a factor in the weakening market. Farm selling continued relatively light but elevators took a substantial share of the available offerings. Spring wheat markets showed little change during the week with most interest in the CCC minimum statutory price. Demand was slow with flour sales very light. Durum wheat dropped 5¢ on the bottom of the range with little interest in durum products. Wheat prices in the Pacific Northwest held firm in slow trading at Portland. Rye prices dropped 10¢ per bushel at Minneapolis reflecting in part the shift to new-crop basis.

Corn prices dropped 2¢ per bushel at most midwest points as another near-record crop was indicated by conditions on July 1. Domestic demand was steady for large receipts but export interest was only moderate. Oats were steady to slightly higher at Chicago but weakened with prospects of new-crop supplies at Minneapolis. Barley held steady at most points in light trading. Grain sorghum prices declined 1¢ per cwt. with approaching new-crop harvest.

Soybean prices declined 1-2¢ per bushel reflecting prospects for another large crop and somewhat indifferent demand for light offerings. Flaxseed held firm as receipts dropped lower at Minneapolis.

NOTICE: The tables on pages 8-15 on wheat inspections for export have been adjusted to show the final destination of U.S. wheat transhipped through Canadian ports. Previously these tables showed, by countries of destination, only the quantity of wheat shipped from U.S. ports. Shipments to Canada were shown as a separate item. In the revised tables, shipments from Canadian ports have been added to shipments from U.S. ports to present a more complete total for individual countries of destination. In order to make this adjustment and maintain accurate figures on wheat exports from the United States, transshipments of U.S. wheat from Canadian ports have been subtracted from shipments of U.S. wheat to Canada. During fiscal year 1963-64, 35.3 million bushels of wheat were inspected for shipment to Canada, while 34.1 million bushels were inspected for export from Canadian ports. Stocks of wheat in Canada on July 1, 1963, totaled 27,120 bushels and on July 1, 1964, totaled 1,336,409 bushels. (Your comments regarding the changes in these tables are invited.

GRAIN EXPORTS ... for the fiscal year ended June 30 totaled a record 1,558 million bushels on the basis of inspections for export. This figure does not include wheat flour or other grain products since they are not subject to the inspection requirement. These exports compare with 1,311 million for the fiscal year 1962-63 and 1,036 million the 5-year (1957-61) average. Exports of wheat, corn and soybeans were all at record levels while exports of grain sorghum were above the average but slightly below 1962-63. Corn exports for the fiscal year, of 437 million bushels compare with 387 million for 1962-63 and 241 million the 5-year average.

EXPORTS OF WHEAT ... grain only, totaled a record 751 million bushels during the 1963-64 season on the basis of inspections for export. Flour exports are expected to total around 98 million bushels in grain equivalent. Of the total grain exports, 319 million bushels were commercial or dollar sales with the balance exported under special programs. The largest of these were exports under Title I of P.L. 480 which totaled 348 million bushels. Exports totaled 27 million bushels each under Title II and the Barter programs. Most of the spring and red winter wheats and all of the durum were exported for dollars as commercial sales. Of the Title I exports, 281 million were hard winter and 62 million white. Again India was our biggest customer for wheat taking over 163 million bushels of which 124 million were hard winter and 39 million white. Japan received nearly 74 million bushels, all for dollars, of which about 40 million were hard winter and the balance white. Exports to the Soviet Union totaled 64 million, with 36 million hard winter, 20 million durum, 7 million white and 1 million red winter. Other countries taking large quantities were Pakistan-57 million; Brazil-46 million; Netherlands and Poland-40 million each; and United Arab Republic 35 million bushels.

CROP PROSPECTS ... as of July 1 were generally good to excellent from the Eastern Corn Belt across the northern plains and most of the Western region, according to reports to the Crop Reporting Board. The largest area of low crop prospects centers in southeastern Colorado, northeastern New Mexico, southwestern Kansas, and the Panhandle areas of Oklahoma and Texas. Increases in acreage for harvest for 1964 compared with 1963 range from 8 percent for wheat and soybeans to decreases of 4 percent for corn, 5 percent for oats and 7 percent for barley. The indicated yield per acre on July 1 was well above average for all grains but slightly below last year for corn, oats and barley. A corn crop of 3,888 million bushels was indicated on July 1. If realized, this would be 5 percent less than last year's record, but 6 percent above the 1958-62 average. Wheat production was forecast at 1,275 million-12 percent above last year. The 1964 oats crop of 363 million was down 9 percent. No production estimates were made for the 1964 crop of soybeans or grain sorghums.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

1/ Includes 32,609 bushels of flaxseed.

Based on weekly reports of inspections for export by U.S. grain inspectors.

Grains: Export prices basis prompt or 30-day shipment, July 16, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2/
		Prices:		
		--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.80	1.25	- .95
Baltimore	No. 2 Red Winter	1.56	1.42	2.65 1.24
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.72 1.79	1.42 -	2.64 - 2.15
Pacific Northwest	No. 2 Western White	1.57	-	- 1.07

1/ The export payment rate for wheat on July 16 was 18¢ per bushel for spring wheat from Duluth, 10¢ for red winter from Baltimore and hard winter from the Gulf, and 5¢ for soft white from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

GRAIN PRICES ABOUT UNCHANGED EXCEPT SPRING WHEAT

Cash grain prices generally fluctuated within narrow limits during the week ended July 23. Spring wheat and barley were the exceptions as these grains declined sharply at Minneapolis in further adjustment to a new crop basis.

Winter wheat markets were steady during the week with prices mostly unchanged to moderately higher. Demand was generally good but somewhat below expectations. Offerings were below normal for the season as producers continued to cling to their holdings of wheat which is mostly at or above the effective support level. Spring wheat dropped 3-8¢ at Minneapolis in light trading, as new crop harvesting got under way. Mills reported a small volume of flour sales but demand for cash wheat was rather limited. Some new crop wheat was received. Durum wheat was unchanged with very little interest for the limited offerings. White wheat prices were mostly unchanged in the Pacific Northwest as export trade was slow. There was a fair demand for nearby shipment. Rye went up 2¢ influenced by report that 1 1/4 million bushels of U. S. rye were sold for export to West Germany.

Corn prices ranged from 1¢ lower to 2¢ higher as growing conditions remained favorable throughout most of the Corn Belt. Offerings increased at Chicago resulting in a weaker market but at Minneapolis where supplies were small prices closed 2¢ above a week ago. Oats went down 1¢ at Chicago and Minneapolis as the new crop was being harvested in the upper Midwest States. Barley dropped 4-6¢ at the top of the range at Minneapolis with buyers quite selective. Prices on the West Coast were 1-2¢ higher with a somewhat improved demand. Grain sorghum was unchanged to 1¢ lower as demand was fairly good for all offerings. Inadequate moisture over a wide area offset effects of the increased harvest in North Texas.

Soybean markets held about steady during the week with little change in prices. Export interest provided the most consistent demand while domestic need continued slow. Crushing of soybeans in June totaled 34.5 million -- 4.5 million below a year ago with the season's total of 330 million, around 35 million less than a year earlier. Flaxseed held steady in light trading at Minneapolis.

Corn - quantity put under price support and outstanding by States	11
Food for Peace Authorizations	12

COUNTY PRICE SUPPORT RATES ... set for 1964-crop soybeans. They are based on national average support price of \$2.25 per bushel announced April 10. For most counties, the rates will be unchanged from those used for the 1963 crop. Modifications are being made, however, in Arkansas, Oklahoma and Michigan to more accurately reflect marketing relationships and to make more equitable the price relationship between adjacent areas separated only by State boundaries. This requires establishing support rates for the first time in counties of central and western Arkansas and eastern Oklahoma.

Imports of wheat, oats, barley, corn, and rye for seed
under the Federal Seed Act, 1957-64

Year beginning July 1	Wheat	Oats	Barley	Rye	Corn
			-- Bushels --		
1957-58	3,507,871	648,106	18,150	31,784	42,905
1958-59	4,013,336	338,588	9,098	491	60,989
1959-60	4,358,995	366,334	34,977	1,107	41,036
1960-61	4,825,608	354,706	55,471	850	46,625
1961-62	2,940,193	443,097	15,473	418	45,409

Grains: Export prices basis prompt or 30-day shipment, July 23, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Corn No. 2	Soybeans No. 2	Barley or Grain
		Prices : Yellow	Yellow	Sorghum 2/
		--Dollars--		
Duluth	No. 1 Heavy Northern : Spring, 14% protein.:	1.75	1.24	- .94
Baltimore	No. 2 Red Winter	1.59	1.42	2.66 1.24
Gulf	No. 1 Hard Winter: Ordinary protein ...: 14% protein	1.72 1.79	1.41 -	2.65 - 2.15
Pacific Northwest	No. 2 Western White ...:	1.57	-	- 1.08

1/ The export payment rate for wheat on July 23 was 15¢ per bushel for spring wheat from Duluth, 10¢ for red winter from Baltimore and hard winter from the Gulf, and 5¢ for soft white from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Grain Market News

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

July 28, 1964

Volume 7 No. 3

Washington, D. C. 20250

Grain prices generally declined during the April-July period with wheat showing the sharpest loss, reflecting mainly an adjustment to a lower price support rate. Carryover wheat stocks on July 1 were 25 percent below a year ago and the smallest since 1958. Feed grain stocks were 8 percent larger than last year despite the smaller barley carryover. July 1 stocks of soybeans were a record--nearly one-fourth more than a year earlier. Exports of wheat, corn, and soybeans have been at record levels the past year.

WHEAT ... prices at the principal markets declined an average of around 60¢ per bushel from April to July, due to the lower price support rate and the slower export demand. Market prices the first three weeks of July averaged 44¢ below a year ago and 68¢ below July 1962. Winter wheat, both soft red and hard winter, declined 70¢ from April to July, reflecting the shift to a new-crop basis. Since the harvest of spring wheat is mainly in August, the drop in this class was less, or about 50¢ per bushel. Offsetting the lower wheat prices, farmers participating in the 1964 Wheat Program will receive about 43¢ per bushel for their normal production in addition to the average support of \$1.30 per bushel. Carryover stocks of wheat on July 1 totaled 900 million and were the smallest, with one exception, since 1953. Of the total carryover, Commodity Credit Corporation owned 854 million. The smaller carryover resulted from the record exports of wheat and flour which totaled 850 million--214 million more than in 1962-63. Milling of wheat for flour at 621 million was 3 percent more than a year earlier. Domestic supplies of wheat for 1964-65, based on July 1 conditions, totaled 2.2 billion bushels--157 million less than last season and the smallest since 1957-58.

RYE ... prices declined 6¢ per bushel the past quarter at Minneapolis but despite the loss, prices in July were 3¢ above a year ago. A 12 percent increase in the 1964 crop was indicated July 1 which in part offsets the smaller carryover stocks. Domestic rye supplies for 1964-65 are estimated at 38 million bushels, as against 36 million for 1963-64. July 1 stocks of 5 million were the smallest since 1952. Disappearance of 32 million last season was down 10 million from the year before due mainly to the drop in exports, which totaled 10 million. Usage for alcohol and milling was at about the previous season's level.

CORN ... prices declined 3¢ on an average at the principal markets during the past quarter reflecting reduced animal numbers and continued unfavorable feeding ratios. Prices the first three weeks of July averaged 6¢ below a year ago. Stocks of corn in all positions on July 1 totaled 2.3 billion bushels, 11 percent more than last year but 3 percent below average. CCC stocks on July 1 totaled 749 million. Production of corn was forecast July 1 at 3,888 million bushels--5 percent less than in 1963. Corn disappearance, October-June, totaled 3,053 million, down 110 million from a year earlier. Exports of corn at 364 million the first 9 months were a record while wet corn milling of 148 million was also a record. Feed usage of 14.3 bushels per animal unit the first 9 months was 0.9 bushels below last year with both smaller animal numbers and total corn feeding.

OATS ... prices declined 3¢ per bushel the last quarter of the season and in July averaged 4¢ below a year ago at Midwest terminals. The smallest crop since 1936 was in prospect July 1 with production estimated at 905 million bushels. Carryover stocks of 315 million were 15 percent above last year. Domestic supplies for 1964-65 of 1,220 million were the smallest in 25 years. Disappearance of oats last season totaled 943 million bushels--the smallest since 1934-35. Exports totaled less than 5 million as against 23 million in 1962-63.

BARLEY ... prices declined sharply the fourth quarter of the season for feeding varieties, but malting types were about steady. Despite the drop, the July average ranged 1-5¢ per bushel above a year ago. Domestic supplies of barley for 1964-65 total 495 million bushels on the basis of July 1 conditions. If realized, this would be 50 million less than last season and the smallest since 1956. Carryover stocks of 133 million were 10 percent less than last year, and the crop, forecast at 363 million, is down 9 percent. Disappearance of 424 million last season was 9 million more than the previous season but below average. Exports totaled 68 million as against 64 million in 1962-63. Industrial usage, mainly beer and alcohol, amounted to nearly 96 million, the largest quantity since 1950. Import of barley last season of 10 million were sharply above 1962-63 but below average.

GRAIN SORGHUM ... prices advanced gradually in the April-June quarter with prices in July 6¢ above last year at Kansas City and 13¢ per cwt. at Ft. Worth. Stocks in all positions on July 1 of 400 million cwt. were 3 percent larger than last year. Of the total July 1 stocks, CCC owned 360 million. Disappearance of 293 million cwt. the first 9 months was 26 million above the same period a year earlier. Exports totaled 44 million cwt. the first three quarters as against 51 million the same months of 1962-63.

SOYBEANS ... prices declined around 10¢ per bushel during the past quarter while in the comparable period last year prices advanced. Prices in July were 12-16¢ per bushel under a year ago. Stocks of soybeans, July 1, were a record high and totaled 171 million bushels, as against 138 million a year ago. Crashings of soybeans, October through June, at 330 million were 35 million less than the same months of 1962-63. Exports of soybeans were a record of 154 million--7 million more than a year earlier.

FLAXSEED ... prices averaged \$3.00 per bushel the first three weeks of July. This is a drop of 10¢ during the past quarter and is 4¢ below July 1963. Stocks of flaxseed on July 1 totaled 13.2 million as against 8.4 million a year earlier. Reported disappearance last season was down from 1962-63. Exports of 3.6 million, July 1963 through June 1964, were 17 percent below the previous season while crashings of 19.4 million were 7 percent lower. Domestic supplies of flaxseed for 1964-65, based on July 1 estimates, total 39 million or about the same as for 1963-64. The smaller crop is offset by the increased carryover stocks.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks for 1963 are preliminary. April-June 1964 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

GRAINS: MONTHLY AVERAGE CASH PRICES

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

5/ July estimate.

Soybeans	72,834	7	68,759	8	23	841
Flaxseed	12,923	10,781	7,023	5,718	10,644	4,929

1/ Includes stocks sold but not delivered.

2/ Includes both purchase agreements and quantities put under loan.

3/ Reported as of June 30, 1964. Does not include the following quantities of grain outstanding under the 1963-crop price support and resale programs: Wheat 17,278,417 bu.; rye 86,071 bu.; corn 308,754,288 bu.; oats 24,245,009 bu.; barley 9,876,738 bu.; grain sorghum 9,168,916 cwt.; soybeans 49,316,901 bu.; and flaxseed 265,552 bushels.

4/ Total deliveries reported through June 30, 1964. May not include all grains delivered from 1962 resale program and does not include following quantities of grains reported outstanding under resale loans as of June 30, 1964. Wheat 19,782,963 bu.; corn 137,015,159 bu.; oats 13,758,176 bu.; barley 9,986,412 bu.; and grain sorghum 6,167,476 cwt.

5/ The principal deliveries from the 1963 corn support program will be made after July 31, the date when loans mature. Therefore, July 1 inventory includes only a small quantity of take-over from the current crop.

SPRING WHEAT LOWER - OTHER GRAINS ABOUT UNCHANGED

Cash grain prices fluctuated within narrow limits during the week ended July 30, with most grains unchanged to slightly higher. Spring wheat and rye were exceptions as prices declined in further adjustment to the new crop.

Hard winter was unchanged to 1¢ lower in a very slow market. Farmers continued to hold while buyers were rather indifferent. Export interest was moderate. Soft red winter declined 2¢ as export inquiry lagged with ample supplies in Europe indicated by trade reports. Spring wheat declined 4-7¢ per bushel as harvest expanded and receipts were more liberal. While there was some flour business, trading was slow and cautious. Durum prices were unchanged with little buying interest. White wheat ruled 1-2¢ lower in the Pacific Northwest reflecting expanded new-crop harvest coupled with slow export and domestic demand. Rye declined 2¢ per bushel, in response to increased movement and slow trading.

Corn went up 1¢ per bushel at most markets with a rather good demand from processors and elevators. Buying interest was encouraged by mounting concern of crop deterioration if the hot dry weather persists. Oats went up 2¢ in a rather quiet market. Barley was firmer with gains of as much as 4¢ at the top of the range for good malting types. Grain sorghum markets were firm at Ft. Worth where limited offerings met good demand but were slightly easier at Kansas City.

Soybeans advanced 1-2¢ per bushel reflecting in part trade reaction to the smaller-than-expected stocks. The market also reflected some improvement in the oil and meal market. Fear of hot and dry weather was also a factor. Flaxseed remained unchanged at Minneapolis while the market strengthened at Winnipeg.

Special Features

	<u>Page</u>
Soybean prices compared with soybean oil and meal prices	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Food for Peace Agreement	6
Wheat - quantity of 1963 crop delivered to CCC, by classes, by States, as of June 30, 1964	7
Grains - U. S. exports, June	8

Soybean prices compared with market value of soybean oil and meal

	: Unit of value	: July 2/ : 1964	: June : 1964	: May : 1964	: July : 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.5	8.2	8.4	8.9
Value from bushel of soybeans 1/	Dollars	0.94	0.90	0.92	0.95
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	65.75	66.45	65.10	72.10
Value from bushel of soybeans 1/	Dollars	1.58	1.59	1.56	1.69
Value of oil and meal from bushel of soybeans 1/	Dollars	2.52	2.49	2.48	2.64
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.43	2.44	2.47	2.56
Spread between soybean price and value of oil and meal	Cents	9	5	1	8

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Grains: Export prices basis prompt or 30-day shipment, July 30, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Prices	Corn No. 2 Yellow	Soybeans: No. 2 Yellow	Barley or Grain Sorghum 2/
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.69	--Dollars-- 1.25	-	.94
Baltimore	No. 2 Red Winter	1.58	1.44	2.67	-
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.72 1.79	1.43 -	2.66 -	2.15 -
Pacific Northwest	No. 2 Western White ...	1.55	-	-	1.09

1/ The export payment rate for wheat on July 30 was 8¢ per bushel for spring wheat from Duluth, 10¢ for red winter from Baltimore and hard winter from the Gulf, and 4¢ for soft white from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN MARKETS RULE FIRM

Cash grain markets closed on a firm note for the week ended August 6, with prices about unchanged from a week earlier. Uncertainty over the Viet-Nam crisis was the principal strengthening factor.

Hard winter wheat generally advanced 1¢ per bushel reflecting substantial export business and tight farm holding. Demand from the mills continued on the quiet side. Soft red winter was unchanged to 1¢ lower as trading remained slow. Spring wheat prices remained steady with only fractional changes. Carlot receipts increased as harvest became general. Flour sales were small with most being sold for nearby use. Durum dropped 6¢ at the top of the range with booking of products very slow. White wheat advanced 2-3¢ reflecting increased export interest and good domestic demand. Rye gained 1¢ per bushel due to good mill demand.

Corn prices advanced 1-2¢ at most points on reports that the crop on the Western edge of the Corn Belt was affected by the continued dry hot weather. Offerings were moderate with demand from country elevators and processors active. Exports continued heavy. Oats went up 1¢ at Chicago where receipts were light as the harvest peak has passed but prices were down 1¢ at Minneapolis as the new crop moved into market. Barley markets were steady to higher on the West Coast but were weaker at Minneapolis as the new crop began coming to market. Malting barley was unchanged to 2¢ lower while feeding grades were off 6¢ per bushel. Grain sorghum was 3¢ per cwt. higher at Ft. Worth but closed 1¢ lower at Kansas City.

Soybeans closed at about last week's level with only a moderate interest in light receipts. Export trade was slow. The crop generally made good progress in the principal producing areas but the Western section needed rain. Flaxseed weakened as harvest got under way and prices declined 3¢ per bushel.

1965 WHEAT PROGRAM: Operation of the program in general will be about the same as that for the 1964-crop year. The principal changes, compared with 1964 program provisions are: 1. Domestic certificates will be worth 75¢ per bushel (were 70¢), and export certificates 30¢ per bushel (were 25¢). 2. Price support national average loan rate will be \$1.25 per bushel (was \$1.30). 3. Program participants can qualify for domestic certificates on 45% and export certificates on 35% of the normal production from their allotment (were 45% each). 4. Wheat and feed grain (including oats and rye) acreage substitution will be possible (none in 1964). 5. If diversion in addition to the required minimum is at least 10% of the farm's 1965 allotment, payment on such additional diversion will be made on 50% of the farm's normal production times the county loan rate on all of such added acres diverted to conserving use. No payment will be made for applying conserving use to the minimum qualifying acreage equal to 11.11% of the 1965 allotment. (Payment in 1964 was at 20% for all acres diverted to conserving use.) 6. A producer can get program loan and certificate allocation benefits if he exceeds his acreage allotment by not more than 50% on any farm in which he has an interest and stores under bond the wheat from the excess acreage, meanwhile carrying out conserving use requirements of the program (not provided in 1964). Signup for the 1965 Voluntary Wheat Program is planned August 24 through October 2, in ASCS offices. This signup will apply only to predominantly winter wheat areas. Program signup for wheat growers in predominantly spring seeded areas probably will take place early next year at the same time as that for the 1965 Feed Grain Program. The 1965 Feed Grain Program will operate under the same legislative authority as in 1964 and therefore will be similar to the 1964 program. The 1965 diversion requirements, payment rates, and loan levels will be determined and announced later.

FLOUR MILLING ... in June was up 32% compared with a year ago according to the Bureau of the Census. Mills ground 61.6 million bushels of wheat in June compared with 49.9 million in May and 46.5 million in June 1963.

Grains: Export prices basis prompt or 30-day shipment, August 6, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley	
	Grade	No. 2	No. 2	or Grain	
		Price	Yellow	Yellow	Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN MARKETS STRENGTHEN

Cash grain markets generally strengthened during the week ended August 13. Spring wheat prices advanced sharply with most other grains about unchanged to 1-2¢ higher. Hot dry weather in much of the Midwest continued to be a market factor.

Winter wheat prices advanced 1-2¢ per bushel at most markets reflecting improved mill and elevator demand. Continued heavy export movement and tight farm holding added strength. Spring wheat advanced 5-6¢ per bushel. Trading was quite brisk and marketing was heavy as harvest reached a near peak in North Dakota. Domestic sales of flour were draggy, but exports of wheat and flour are ahead of last year. Durum prices dropped sharply about midweek but recovered most of the loss and closed at about last week's level. White wheat continued steady in the Pacific Northwest reflecting good domestic demand and increased exports. Rye gained 1¢ per bushel as harvest neared completion.

Corn prices fluctuated within narrow limits and closed mostly unchanged to 1¢ higher. Reports of deterioration in wide areas lent strength while heavy exports absorbed most offerings. Oats gained 1-2¢ reflecting a good demand for the small supplies. Barley markets were about unchanged with trading active in the intermediate grades. Grain sorghum markets continued firm with reports of heat damage over wide areas. Production was estimated at 473 million bushels--19 percent below last year.

Soybean markets were firm with prices mostly 1¢ per bushel above a week ago. Crop conditions declined last week due to generally hot, dry weather. The crop was forecast at 748 million bushels on the basis of August 1 conditions. Flaxseed markets weakened slightly and prices declined 2¢ per bushel.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

August 21, 1964

GRAIN MARKETS HIGHER

Cash grain markets continued to gain ground during the week ended August 20. Prices advanced as farmers limited marketings and crop prospects continued relatively unfavorable.

Winter wheat advanced 2¢ per bushel as buyers raised bids to attract supplies. Offerings continued light as farm selling was extremely tight. Millers were scrambling to fill needs for immediate grind and export demand was active. Spring wheat gained 4-6¢ per bushel reflecting in part settlement of the strike at Duluth. Movement of wheat remained heavy but offerings were not large. Export demand, along with demand from domestic mills provided ready outlets. Durum was down 5¢ at midweek but rebounded to close about unchanged. White wheat continued steady in the Pacific Northwest with a moderate export interest. Rye gained 1¢ per bushel at Minneapolis.

Corn markets were mostly steady as cool temperatures and lack of soil moisture slowed plant development. Prices at Chicago and Minneapolis gained 1¢ but were fractionally lower at Omaha and Kansas City. Oats were firm with demand good for light offerings. Barley markets strengthened with prices mostly 2¢ higher. Some intermediate grades gained as much as 6-8¢ as offerings were below trade needs. Grain sorghum advanced 1¢ per cwt. reflecting light supply and good demand. Some harvest is underway around Lubbock, Texas, but yields are disappointing.

Soybeans advanced 1¢ per bushel stimulated in part by news of drought in growing areas. However, cooler weather brought some relief and slowed deterioration. Demand remained moderate although country offerings continued light. Flaxseed held steady at Minneapolis. Selling was light with prices 10¢ per bushel under the effective loan rate.

Feed grains - CCC sales against Certificate Pool	14
Wheat - quantity put under price support, selected States, July 31, 1964	14
Corn - quantity repaid, delivered, and outstanding under price support by States	15
Grains - quantity under price support	16

PRICE SUPPORT ACTIVITIES ... through July show that farmers put 50.5 million bushels of 1964-crop wheat under price support loan. This compares with 43.2 million of 1963-crop wheat a year earlier. About 5.5 million cwt. of grain sorghum had been put under price support through July 31 as against 4.2 million last year by the same date. Of the 386 million bushels of 1963-crop corn put under loan, farmers had redeemed 139 million, or 36 percent of the total by July 31. A year earlier farmers had redeemed only 7 percent of the 536 million under loan from the 1962 crop. Of the nearly 70 million bushels of 1963-crop soybeans put under loan, farmers had repaid loans on 33 million and delivered only 12,928 bushels. (Details p. 14-16).

EXPORTS OF WHEAT ... (including flour) from the four principal exporting countries (United States, Canada, Argentina and Australia) totaled a record 1.8 billion bushels for the year ending June 30, 1964. These exports are 600 million above the previous year and 400 million above 1961-62, the previous record in 1961-62. Exports increased sharply in each of the countries with new records established in all but Argentina. U. S. exports of 860 million in 1963-64 were 48 percent of the four-country total as against an average of 52 percent for recent years. Canadian exports of 554 million were 225 million above the previous year -- 31 percent of the total as against 27 percent for the previous years.

WHEAT INSPECTIONS FOR EXPORT ... the percentage of wheat exports grading No. 2 or better was nearly as great under the new standards that became effective June 1 as under the old standards. Practically all of the wheat exported in June and July graded No. 2 or better. Less than one percent of the July exports graded below No. 2. This is about the same as for the 1963-64 crop year. However, a smaller percentage (only 11 percent in June and 9 percent in July) graded No. 1. This compares with 37 percent grading No. 1 in July 1963.

Grains: Export prices basis prompt or 30-day shipment, August 20, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.80	1.27	-	.98
Baltimore	No. 2 Soft Red Winter.	1.60	1.40	2.71	1.27
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.75 1.82	1.39 -	2.68 -	2.17 -
Pacific Northwest	No. 2 Western White ..	1.54	-	-	1.14

1/ The export payment rate for wheat on August 20, was 19¢ per bushel for spring wheat from Duluth, 12¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

August 28, 1964

GRAIN MARKETS CONTINUED TO ADVANCE

Cash grain markets continued to strengthen during the week ending August 28. Wheat prices advanced as farmers continued a holding tendency. Other grains strengthened reflecting unfavorable crop reports.

Winter wheat advanced 1-2¢ per bushel. Demand was aggressive for light offerings. Despite the holding tendency on the part of producers, mills were able to obtain needs against grind from terminal and country houses. Exporters bought substantial amounts from Commodity Credit Corporation. Spring wheat gained 2-4¢ per bushel as exporters and millers raised prices in order to meet their commitments. Durum advanced 5¢ per bushel over the previous week. White wheat trading was extremely light due to the absence of P. L. 480 agreements. Prices remained unchanged. Rye gained 6¢ per bushel at Minneapolis.

Corn markets advanced 3-5¢ per bushel as a result of reports of drought damage and increased feed demands. Recent rains brought relief to large areas of the corn belt but some of the acreage had already suffered irreparable damage. Oats were firm with active demand for light offerings. Barley markets strengthened with prices mostly 2¢ higher. Interest was mainly for the better qualities. Grain sorghum held steady. Recent rains helped the late planted crops.

Soybeans advanced sharply, gaining 4-6¢ per bushel. Strength reflected fear of drought damage despite recent rains which generally improved plant conditions. Flaxseed markets were steady at Minneapolis.

Special Features

	<u>Page</u>
Soybeans and flaxseed - supply and distribution, monthly	2
Grains - export prices at specified points	2
Wheat - inspected receipts by classes at selected markets, July	6-7
Grains - inspected receipts at selected markets, July	8-9

Balance on August 1 for processing, export or carryover	136,006	105,169	35,383	35,593

1/ The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1. 2/ Partly estimated.

Grains: Export prices basis prompt or 30-day shipment, August 27, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade		No. 2	No. 2	or Grain
		Price	Yellow	Yellow	Sorghum <u>2/</u>
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.82	1.31	-	1.03
Baltimore	No. 2 Soft Red Winter.	1.61	1.40	2.75	1.29
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.75 1.82	1.41 -	2.72 -	2.17 -
Pacific Northwest	No. 2 Western White ..	1.54	-	-	1.16

1/ The export payment rate for wheat on August 27, was 16¢ per bushel for spring wheat from Duluth, 13¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

WEEKLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 36 Washington, D. C. 20250 September 4, 1964

GRAIN MARKETS MOSTLY UNCHANGED

Cash grain markets fluctuated within narrow limits during the week ended September 3, and closed at about last week's level. Light to moderate rains over much of the Midwest improved prospects for the 1964 crop of corn and soybeans.

Winter wheat prices were unchanged to 1¢ lower as demand continued aggressive for light offerings. Although prices were well above the loan level, farm selling was meager. Both export and domestic interests were active buyers, and with prices above the statutory minimum, purchases from CCC increased sharply. Spring wheat prices were about unchanged with producers holding. Prices averaged about 20¢ above the effective loan level. Demand for durum wheat was strong and prices advanced 8¢ during the week. White wheat held steady in the Pacific Northwest while hard winter declined 2¢ in this area. Export trading was moderate, but farm selling was slow. Rye gained 1-4¢ although little was offered. Flour trade remained quiet.

Corn markets were easy with prices mostly unchanged to slightly lower. Prices were firm where supplies were limited. Offerings were ample for processor demand, but heavy export interest provided a firm undertone. Oats markets were firm with prices unchanged to 2¢ per bushel higher. Receipts continued small. Barley was unchanged at the top of the range but gained 2-4¢ for the intermediate grades. Grain sorghum markets were mixed with weakness at Ft. Worth due to increased offerings as harvest became more general. Demand remained good.

Soybeans fluctuated within narrow limits with prices mostly unchanged to 1¢ higher. Demand was ample for scarce offerings. Most buying was limited to immediate needs only. Flaxseed held steady. Reports indicate that 80 percent of Southern North Dakota fields are combined. Selling remained light.

Grains - CCC dispositions	12

COUNTY PRICE-SUPPORT RATES ... announced for 1964-crop corn. The 1964 county corn rates are based on a national average total support price of \$1.25 per bushel, consisting of a price support payment of 15¢ per bushel and a loan rate averaging \$1.10 per bushel. The county price support loan rates will be for 1964-crop corn grading No. 3, or No. 4 on the factor of test weight only but otherwise grading No. 3 except for moisture. Premiums and discounts for other grades and qualities are unchanged from those in effect in 1963. The rates are different from those in 1963 as follows: loan rates three cents higher to reflect the difference between the \$1.07 level for 1963 and this year's \$1.10 per bushel national average; the price support payment is 15¢ for the 1964 crop as against 18¢ for 1963; and additional increases of from one to three cents per bushel have been made in certain States outside the major producing areas in order to more nearly reflect historical prices received by farmers.

Food for Peace Authorizations, August 28-September 3, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
India	Sept. 1	39-125	Wheat 1/	575,000	39,721
United Arab Republic	" 3	46-115	Wheat flour	150,000	13,030

1/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, September 3, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.81	1.30	-	1.00
Baltimore	No. 2 Soft Red Winter.	1.61	1.41	2.75	1.29
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.76 1.83	1.40 -	2.73 -	2.17 -
Pacific Northwest	No. 2 Western White ..	1.51	-	-	1.15

1/ The export payment rate for wheat on September 3, was 15¢ per bushel for spring wheat from Duluth, 14¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5 ¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Based on weekly reports of inspections by licensed grain inspectors. 1/ Includes Belgium 36,000 bushels.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Aug. 2/ 1964	July 1964	June 1964	Aug. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.8	8.5	8.2	8.2
Value from bushel of soybeans 1/	Dollars	0.97	0.94	0.90	0.88
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	64.90	65.55	66.45	75.30
Value from bushel of soybeans 1/	Dollars	1.56	1.57	1.59	1.77
Value of oil and meal from bushel of soybeans 1/	Dollars	2.53	2.51	2.49	2.65
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.48	2.43	2.44	2.56
Spread between soybean price and value of oil and meal	Cents	5	8	5	9

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Average prices received by farmers, effective parity, and support rates
(Dollars per bushel except grain sorghum per cwt.)

Grains	Average farm price				Effective parity	Av. price as percent of parity	National average price support rate 1/		
	Aug. 15, 1964	July 15, 1964	Aug. 15, 1963	Aug. 15, 1964	Aug. 15, 1964	Aug. 15, 1964	1964 crop	1963 crop	1962 crop
Wheat	1.33	1.33	1.77	2.52	53	2/1.30	2.00	2.00

August 30, 1963 ..	773	-	1,064	-	8,557	-	529,021	-

1/ Based on marketing year July 1 for barley, grain sorghum and wheat; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 Feed Certificate Pool remaining for liquidation on August 28, 1964 totaled \$797,231,628 and for the 1964 Feed Certificate Pool \$363,821,152.

NOTE: Cumulative total wheat sales (and Kansas City storable sales) have been adjusted downward this week by 6,381,556 bushels and \$10,882,198.

United States Wheat: Supply and distribution

Item	1964-65	1963-64	1958-62 Average
--Million bushels--			
Carryover stocks, July 1	899.8	1,194.9	1,244.6
Production	1,285.3	1,137.6	1,252.8
Total supply	2,185.1	2,332.5	2,497.4
Estimated quantity for feed, seed, and industrial use for season 1/.....	130.0	78.5	98.0
Quantity remaining for milling, export, or carryover	2,055.1	2,254.0	2,399.4
Disappearance July through August 31:			
Milled for flour	2/ 78.0	101.2	96.6
Exported as grain	2/ 99.8	99.6	72.8
Total milled and exported	177.8	200.8	169.4
Balance on September 1 for milling, export, or carryover :	1,877.3	2,053.2	2,230.0
Supplementary information:			
Imports, July-August 31	2/ 0	0.3	0.4
Exports of flour in grain equivalent, July-August	2/ 11.0	12.5	13.3

1/ Includes an estimate for breakfast food which is not included in quantity of wheat milled for flour. Does not include imports, the major portion of which is used for feed.

2/ Data for August estimated.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. September 3, to 3:30 p.m., e.d.t. September 4, 1964.

	WHEAT RATES (Cents per bushel)			FLOUR RATES
	Hard Red Spring	Hard Red Winter	Other Classes 1/	(Cents per 100 lbs.) 2/
Export Rate Period Thru April 15, 1965				
EAST COAST				
(Including St. Lawrence and Great Lakes ports)	15	14	14	166
GULF COAST	15	14	14	3/ 167
WEST COAST	15	13	5	164

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excluding Durum wheat.

2/ This rate takes account of flour milled from wheat to which domestic marketing certificates apply.

3/ Includes Puerto Rico.

September 11, 1964

GRAIN MARKETS LITTLE CHANGED

Cash grain markets showed little change during the week ended September 10, and prices generally fluctuated within narrow limits. New crop prospects decreased for corn and soybeans during August according to the Crop Reporting Board.

Winter wheat prices held steady during the week and continued at the statutory level. Widespread reluctance to sell by farmers and secondary holders forced buyers to scramble for supplies. Exporters were aggressive bidders despite substantial sales by CCC, and mills also were in the market for fair amounts. Spring wheat prices fluctuated within narrow limits and closed at last week's level. Demand was good for the light offerings. The durum market was nervous with the top of the range 1¢ lower and the bottom 11¢ below last week. White wheat lost 1-2¢ in the Pacific Northwest as more liberal offerings were available from the country. Trading improved with a good export volume. Rye declined 3-4¢ as demand was only fair and traders were inactive.

Corn markets averaged mostly unchanged with losses of 1¢ at Kansas City and Omaha, about offset by gains of 1¢ at Chicago and St. Louis. Corn moved in a limited volume and export sales kept the market on a firm basis. Oats held steady in light trading. Malting barley was firm but about unchanged while feeding barley advanced 5-6¢ with a good demand. Grain sorghum prices dropped 8-10¢ per cwt. at Kansas City as new crop supplies met an indifferent demand. Prices were unchanged at Ft. Worth.

Soybeans declined 1-2¢ per bushel as harvest of the new crop is about two weeks ahead of last year. Export demand was good, and the market continued firm for both oil and meal. Flaxseed prices were unchanged from a week ago. Harvest has been delayed by wet weather in North Dakota.

Wheat and Wheat flour - IWA sales through July 31, 1964	14-15
Feed grains - CCC sales against Certificate Pool	16

ACREAGE DIVERSION FOR 1965 FEED GRAIN PROGRAM SET: Minimum diversion for participation will be 20 percent of the feed grain base, the same as last year. Any farmer may divert up to 50 percent of his base, or 25 acres, whichever is larger. The announcement was made early in order to help farmers make plans for the 1965 crops. Specific provisions of the feed grain program would await more definite indications of the outturn from this year's corn crop.

CANADA'S 1964 GRAIN CROPS ... will be smaller than last year's excellent output on the basis of the August 15 forecast by the Dominion Bureau of Statistics. A wheat crop of 596 million was forecast -- 18 percent less than last year's record crop of 723 million. Supplies of wheat for 1964-65 total 1,057 million, a drop of 153 million from last year. Exports of nearly 600 million bushels last season were the largest of record, almost double the 5-year average. A 1964 barley crop estimated at 169 million compares with a year ago of 221 million bushels. An oats crop of 357 million bushels was forecast as against last year's output of 453 million. A rye crop of nearly 13 million is about the same as a year ago while the flaxseed estimate of about 20 million is down 7 percent from last year.

1964 CROP PROSPECTS ... for corn and soybeans were lowered by high temperatures early in August and the estimate of production on September 1 is down, according to the Crop Reporting Board. The 1964 corn crop is now estimated at 3,640 million as against 3,885 million on August 1 and the 1963 crop of 4,082 million bushels. A soybean crop of 704 million, still a record, was indicated by September 1 conditions. This is 43 million less than the August 1 estimate but 3 million more than the 1963 crop. Prospects for the grain sorghum crop improved with the outturn forecast at 497 million bushels as against 473 million in August and the 1963 crop of 583 million bushels.

Grains: Export prices basis prompt or 30-day shipment, September 10, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley
	Grade	No. 2	No. 2	or Grain
	Price	Yellow	Yellow	Sorghum 2/
		--Dollars--		
Duluth	No. 1 Heavy Northern

	14% protein	1.83	-	- -
Pacific Northwest	No. 2 Western White	1.53	-	- 1.15

1/ The export payment rate for wheat on September 10, was 17¢ per bushel for spring wheat from Duluth, 14¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5 ¢ for white wheat from the West Coast). To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ Total carryover of Canadian grain in Canada and U. S.

2/ Total domestic use including seed, feed, food, and other items.

3/ Wheat exports include flour; other exports are grain only.

4/ August estimate of production.

5/ Partly estimated.

Based on official Canadian reports.

SOYBEANS ADVANCE SHARPLY - OTHER GRAINS STRENGTHEN

Soybean prices chalked up a sharp advance during the week ended September 17. Most other cash grains finished on a stronger note.

Winter wheat closed 1-3¢ per bushel higher in the hard wheat area and 4-6¢ higher in the soft wheat area. Brisk demand for continued light offerings gave support to the cash market. Farmers persisted in holding wheat despite the favorable relationship of cash prices to effective loan rates. Spring wheat held firm behind good demand but durum weakened at Minneapolis. White wheat prices softened in the Pacific Northwest where trading was on the quiet side. Rye moved up 4¢ in a very thin market, with little developing in the way of exports.

Corn prices showed little change but finished on the firm side at a couple of major markets. Offerings appeared ample for rather light demand. Oats were steady to 3¢ per bushel higher, reflecting good demand for light offerings. Barley showed a steady to 2¢ higher trend as buyers tried to attract needed supplies. Grain sorghum went up 3-4¢ per cwt. at Ft. Worth as increased offerings from new-crop harvest met good interest from California buyers. Prices ruled firm in Kansas City.

Soybeans scored one of the sharpest gains of the season as cash prices advanced 17-18¢ per bushel. The upturn came on the heels of the September crop forecast which was down 43 million bushels from the August 1 estimate. Spot market activity was quiet, however, as the trade busied itself interpreting various private reports of weather and crop conditions in producing areas, reanalyzing 1964 carryover estimates and the outlook for 1965 usage and carryover. Flaxseed advanced 10¢ with offerings falling short of trade needs at Minneapolis.

Wheat - quantity put under price support by States	9
Corn and soybeans - quantity repaid, delivered, and outstanding under price support by States	10-11
Grains - quantity under price support	12

PRICE SUPPORT ACTIVITIES THROUGH AUGUST ... showed that farmers had put 84.8 million bushels of 1964-crop wheat under loan. This compares with 79.4 million bushels of 1963-crop wheat put under loan through the same month a year ago. Of the nearly 85 million bushels of 1964 wheat under loan, 60.5 million bushels were warehouse-stored and 24.3 million bushels were farm-stored. Quantities of other 1964-crop grains put under price-support loans through August also ran larger than the same period a year earlier. (See table on page 12.) Meanwhile, farmers repaid loans on 48 million bushels of 1963-crop corn during August. This brought total repayments for the 1963 crop to almost 187.3 million bushels. A year earlier, farmers had repaid loans on nearly 56 million bushels of 1962-crop corn through August. With the 187.3 million bushels in repayments deducted from the 395.3-million-bushel-total quantity of 1963-crop corn placed under price support, the possible take over cannot be more than 207.9 million bushels -- the smallest such quantity since the 1951 crop.

SECOND WHEAT SIGN-UP REPORT ... showed that 183,029 farms have signed up in the 1965 wheat program. Enrollment began August 24 and continues through October 2. The 183,029 farms in the current sign-up report represent 22 percent of the effective national wheat allotment in counties of States where sign-up is under way. These States are in the predominantly winter wheat areas. Exclusively spring wheat growers sign up next spring. Farms thus far signed up have effective allotments totaling 9,533,735 acres. Of this total, nearly 8.4 million acres are on farms where producers elected to stay within or cut acreage below their 1965 allotment. The remaining almost 1.2 million acres of allotments are on farms where producers are electing to use the program provision permitting overplanting of allotments. These growers merely state an intention. They do not give the number of planned excess acres.

Grains: Export prices basis prompt or 30-day shipment, September 17, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn : No. 2 : Yellow	Soybeans : No. 2 : Yellow	Barley : or Grain : Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.82	1.29	-	1.07
Baltimore	No. 2 Soft Red Winter.	1.66	1.44	2.93	1.37
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.77 1.84	1.42 -	2.91 -	2.21 -
Pacific Northwest	No. 2 Western White ..	1.52	-	-	1.16

1/ The export payment rate for wheat on September 17, was 19¢ per bushel for spring wheat from Duluth, 14¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

^{5/} Corrected.

STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 39

Washington, D. C. 20250

September 25, 1964

GRAIN MARKETS GENERALLY LOWER

Cash grain markets generally declined during the week ended September 24. Corn, wheat, and soybeans closed below a week ago while grain sorghum and flaxseed advanced.

Hard winter wheat held about steady during the week with only a tinge of weakness reported. Export demand was active and mills were in the market to replace current grind. Offerings were limited as farm selling continued extremely tight. Exporters and country elevators acquired most of their needs from CCC. Soft red winter wheat declined 3-6¢ per bushel due to some easing in export demand. Spring wheat declined 1-2¢ per bushel reflecting slow flour sales and limited trade in both bakery flour and family brands. Durum wheat was down 5¢ with large receipts and slow sales reported for semolina. White wheat was off 3¢ per bushel in the Pacific Northwest under slow demand from both exporters and mills. Country selling continued limited. Rye dropped 6¢ as export orders failed to come in and the flour market was quiet.

Corn markets weakened with harvest nearing and prices generally declined 2-3¢ per bushel. Demand was good at the lower level. White corn was scarce and prices closed 2¢ higher at Kansas City. Oats lost 1-2¢ per bushel lower reflecting the general weakness. The barley market strengthened with prices 2-4¢ higher at Minneapolis and about unchanged on the West Coast. Grain sorghum went up 1-2¢ per cwt. reflecting active demand for very limited supplies. Wet weather hindered harvest.

Soybeans declined 4-6¢ per bushel as harvest was expected to increase receipts sharply after general rains over wide areas. Oil prices advanced while meal held about steady. Flaxseed advanced 3¢ per bushel with receipts about in line with the demand.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by classes at selected markets, August	6-7
Grains - inspected receipts at selected markets, August	8-9
Feed grains - CCC sales against Certificate Pool	10
Food for Peace Authorizations	10
Wheat - supply and distribution in four exporting countries	11
Soybeans and flaxseed - supply and distribution, monthly	12

MINIMUM CCC SALES PRICE FOR SOYBEANS ... will be continued for another year. The present minimum sales price policy for Commodity Credit Corporation-owned soybeans acquired under the price support program will be continued through September 30, 1965. The minimum sales price will apply to any 1963- or 1964-crop soybeans acquired by CCC. As in the past, the actual sales price will be the higher of the market price or the minimum price. The minimum price is the county support rate for 1964-crop No. 2 grade soybeans plus 19¢ per bushel. The National average price support level is \$2.25 per bushel, and with the 19-cent margin, the CCC average minimum sales price thus will be \$2.44 per bushel.

WHEAT SUPPLIES ... available for export or carryover on September 1 in the four principal exporting countries (United States, Canada, Argentina and Australia) totaled 2,450 million bushels. This is around 300 million less than a year ago and 125 million less than two years ago. U. S. supplies were down by about 190 million and the Canadian supplies were 165 million below last year. Supplies on September 1 in Argentina were nearly 50 million above last year while those in Australia were only slightly lower. Exports of wheat and flour from these four countries during July and August totaled around 272 million bushels. This is 60 million more than the same months last year and about 100 million more than two years ago. U. S. exports in these months were about the same but Canadian exports were nearly double those of 1963. Exports from Argentina were also sharply higher while those from Australia were smaller.

Grains: Export prices basis prompt or 30-day shipment, September 24, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

	14% protein	1.84	-	-	-	-	-	-
Pacific Northwest	No. 2 Western White ...	1.50	-	-	-	-	-	1.15

1/ The export payment rate for wheat on September 24, was 19¢ per bushel for spring wheat from Duluth, 14¢ for soft red winter from Baltimore and hard winter from the Gulf, and 4¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Production	701,465	669,211	28,269	31,481
Total supply	716,520	726,776	41,452	39,869
Adjusted total supply ^{1/}	716,600	716,276	-	-
Disappearance through August 31:				
Seed, feed and residual for season ..	51,000	46,400	3,000	3,664
Crushed for oil or processed	404,633	442,310	3,511	1,614
Exported	^{2/} 178,316	173,173	^{2/} 2,042	728
Total disappearance	633,949	661,883	8,553	6,006
Balance on September 1 for processing, export or carryover	82,651	54,393	32,899	33,863

^{1/} The soybean supply has been adjusted by subtracting crushings and exports of new-crop soybeans in September and adding an estimate for crushings and exports of new-crop beans the following September. Estimated new-crop crushings and exports were as follows, in million bushels: September 1962 - 17.0; September 1963 - 6.5; and September 1964 - 6.5. No allowance is made for new-crop flaxseed crushed prior to July 1.

^{2/} Partly estimated.

October 2, 1964

GRAIN MARKET UNCHANGED TO HIGHER

Cash grain prices fluctuated within narrow limits during the week ended October 1 but generally closed on a firm to somewhat higher level. Soybeans and spring wheat showed the greatest advance but there was weakness in corn at some markets.

Winter wheat prices were steady with the close about the same as a week ago. Buying interest was slow during most of the week. Export demand ebbed following recent heavy purchases. Mill demand was slow with sufficient stocks to meet nearby needs. Country offerings continued very light. Spring wheat went up 2-4¢ with the larger increase on the higher proteins. Demand for wheat was urgent with a determined holding policy on the part of the country. Shipping instructions on flour were good. Durum was up 5-8¢ per bushel as selling was reduced sharply. White wheat markets were dull in the Pacific Northwest with limited export demand. Prices held steady to slightly higher reflecting lack of country selling. Rye gained strength from spring wheat and went up 2¢ during the week. Receipts were light, but so was demand.

Corn markets were mostly unchanged to slightly lower. Nearness of new crop supplies was a weakening factor. Harvesting weather improved in many areas after the general rains. However, offerings continued light and were well absorbed by the good demand. Oats closed unchanged with demand good for light offerings. Barley advanced to new highs for the season at Minneapolis but were unchanged to higher on the West Coast. Grain sorghum declined 2¢ per cwt. at Kansas City with increased offerings but held steady at Ft. Worth.

Soybeans advanced 3-5¢ per bushel reflecting a good demand for very light offerings. Good export demand and favorable processing margins contributed to the strength of the market. Flaxseed gained 5¢ per bushel at Minneapolis.

Special Features

Grains - export prices at specified points	2
Corn, grain sorghum and soybeans - prices by months at principal markets, 1959-64	6-11
Corn, grain sorghum and soybeans - export prices, f.o.b. vessel	8-9-11
Corn, grain sorghum and soybeans - average farm prices by months, 1959-64	11
Feed grains - CCC sales against Certificate Pool	12

38 WHEAT VARIETIES ... undesirable because of inferior milling or baking qualities will be discounted 20 cents per bushel in price-support rates on the 1965 wheat crop. The number and varieties are unchanged from those for the 1964 crop. Notice of these discounts is given to discourage plantings of these undesirable wheat varieties.

THIRD WHEAT SIGN-UP REPORT ... showed that 462,797 farms signed up in the 1965 wheat program. This is already 8 percent greater than the total sign-up in 1963. Farms thus far signed up represent 57 percent of the effective national wheat allotment in counties of States where sign-up is under way. Total diversion on signed farms represent 3,708,083 acres. (Details will be published after the next release in about two weeks.)

Food for Peace Authorizations and Agreements, September 25-October 1, 1964

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
<u>AUTHORIZATIONS</u>					
United Arab Republic	Oct. 1	46-117	Wheat 1/	240,000	16,623
<u>AGREEMENTS</u>				Thousand bushels	
Viet-Nam	Sept. 29	-	Wheat or flour	2,300	5,600
Iran	" 29	-	Wheat or flour	5,100	11,500
India	" 30	-	Wheat or flour	147,000	274,500

1/ Hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, October 1, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.84	1.28	-	1.04
Baltimore	No. 2 Soft Red Winter.	1.61	1.40	2.85	1.36
Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	1.78 1.85	1.38 -	2.88 -	2.17 -
Pacific Northwest	No. 2 Western White	1.50	-	-	1.15

1/ The export payment rate for wheat on October 1, was 22¢ per bushel for spring wheat from Duluth, 15¢ for soft red winter from Baltimore and hard winter from the Gulf, and 4¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN MARKETS SHOW MIXED TREND

Cash grain markets displayed a mixed trend for the week ended October 8. However, closing prices of most grains except oilseeds were generally no more than a couple of cents over or under the previous week's finish.

Winter wheat closed unchanged to 3¢ per bushel higher, reflecting for the most part a stronger futures market. Demand was on the slow side, but readily absorbed limited country marketings. Spring wheat showed little change in either direction. Durum prices softened. Spring wheat selling continued light, but with good running times mills were in need of supplies. Durum trading was slow as quality was lacking in many offerings. Pacific Northwest wheat markets were not much changed. Buying interest was dull, and movement from the country remained slow. Rye held steady at Minneapolis where the lack of exports, weakness at Winnipeg, and talk of imports from Canada discouraged buying.

Corn prices fluctuated within a very narrow range but closed with a weaker undertone. Many buyers operated on a hand-to-mouth basis until marketings pick up as new-crop harvesting expands. Oats held mostly steady in light trading. Barley held its own or was a little stronger at most markets. However, some of the intermediate kinds traded 4-6¢ lower at Minneapolis. Grain sorghum held steady in the face of a rapidly spreading harvest.

Soybeans advanced 3-4¢ per bushel. Demand was good, stimulated by slow country selling, strength in oil, and last week's inspections for export which were larger than many traders had anticipated. Yield news from some harvesting areas also was a factor. Flaxseed lost 4¢ in slow trading in Minneapolis.

1/ Payment-in-kind rates for 1964-crop are included as follows: corn 15¢, Barley 1¢ per bushel, grain sorghum 23¢ per cwt.; 1963-crop wheat and corn 18¢, barley 14¢ per bushel, grain sorghum 29¢ per cwt.; 1962-crop none.

2/ Does not include 70¢ per bushel domestic marketing certificate and 25¢ per bushel for export marketing certificate.

Grains: Export prices basis prompt or 30-day shipment, October 8, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Corn	Soybeans	Barley
	Grade	No. 2 Price	No. 2 Yellow	or Grain Sorghum <u>2/</u>
		--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.84	1.26	- 1.04
Baltimore	No. 2 Soft Red Winter.	1.63	1.40	2.87 1.27
Gulf	No. 1 Hard Winter: Ordinary protein	1.79	1.37	2.90 2.17
	14% protein	1.86	-	- -
Pacific Northwest	No. 2 Western White ..	1.50	-	- 1.14

1/ The export payment rate for wheat on October 8, was 22¢ per bushel for spring wheat from Duluth, 15¢ for soft red winter from Baltimore and hard winter from the Gulf, and 4¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN: Commodity Credit Corporation Estimated Non-committed Inventory

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

^{1/} Commercial sale.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. October 8, to 3:30 p.m., e.d.t. October 9, 1964.

	:	WHEAT RATES (Cents per bushel)			:	FLOUR RATES	
	:	Hard Red Spring:	Hard Red	:	Other	:	(Cents per
	:		Winter	:	Classes <u>1/</u> :	100 lbs.) <u>2/</u>	
<hr/>							
	:	Export Rate Period Thru April 15, 1965					
<hr/>							
EAST COAST	:						
(Including St. Lawrence	:						
and Great Lakes ports)	:	22	15	15		167	
GULF COAST	:	22	15	15	<u>3/</u>	167	
WEST COAST	:	22	14	4		162	

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

^{1/} For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excluding Durum wheat.

^{2/} This rate takes account of flour milled from wheat to which domestic marketing certificates apply.

^{3/} Includes Puerto Rico.

2/ White, hard red spring, hard red winter, and mixed wheat.

United States Wheat: Supply and Distribution

Item	1964-65	1963-64	1958-62 Average
--Million bushels--			
Carryover stocks, July 1	899.8	1,194.9	1,244.6
Production	1,290.0	1,137.6	1,252.8
Total supply	2,189.8	2,332.5	2,497.4
Estimated quantity for feed, seed, and industrial use for season 1/	130.0	78.5	98.0
Quantity remaining for milling, export, or carryover	2,059.8	2,254.0	2,399.4
Disappearance July through September 30:			
Milled for flour	2/ 125.5	150.0	145.6
Exported as grain	2/ 163.5	151.3	111.4
Total milled and exported	289.0	301.3	257.0
Balance on October 1 for milling, export, or carryover ...	1,770.8	1,952.7	2,142.4

Supplementary information:			
Imports, July-September 30	2/ 0.4	0.5	0.8
Exports of flour in grain equivalent, July-September 30:2/	16.6	20.0	20.4

1/ Includes an estimate for breakfast food which is not included in quantity of wheat milled for flour. Does not include imports, the major portion of which is used for feed. 2/ Data for September estimated.			

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Sept. 1964	Aug. 1964	July 1964	Sept. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	9.6	8.8	8.5	8.4
Value from bushel of soybeans 1/	Dollars	1.06	0.97	0.94	0.90
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	69.80	64.90	65.55	75.10
Value from bushel of soybeans 1/	Dollars	1.68	1.56	1.57	1.76
Value of oil and meal from bushel of soybeans 1/	Dollars	2.74	2.53	2.51	2.66
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.61	2.48	2.43	2.58
Spread between soybean price and value of oil and meal	Cents	13	5	8	8

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Feed Grains: CCC sales against Certificate Pool

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 12 No. 42 Washington, D. C. 20250 October 16, 1964

CORN AND SOYBEANS LOWER

Corn and soybean markets reacted to increased harvesting and prices closed lower for the week ended October 15. Prices declined despite reduced estimates of production. Wheat, barley and flaxseed averaged slightly above a week ago.

Hard winter wheat prices generally advanced 2¢ per bushel reflecting continued good export demand. Farm selling continued light, but mill demand remained sluggish. Soft red winter prices were mostly 1¢ per bushel below a week ago. Spring wheat gained 1¢ per bushel with a good interest, but few of the buyers were pressed for supplies. Durum prices were unchanged at the top but dropped 6¢ at the bottom of the range. The quality of the arrivals was down. White wheat held steady in the Pacific Northwest, but hard winter went up 2-3¢ reflecting good export demand and tight producer holdings. Rye declined 2¢ per bushel due to light flour sales and lack of export demand.

Corn prices declined 3-4¢ per bushel at Chicago and Minneapolis as harvesting made good progress over most of the Corn Belt. The quality of much of the early arrivals was excellent. Demand was good at the lower level. Oats held steady in light trading. Feeding barley held steady to 2¢ higher behind fair demand. Top malting barley was unchanged, but lower grades declined. Grain sorghum was unchanged to 2¢ per cwt. higher with offerings readily absorbed.

Soybeans declined 8¢ per bushel as harvesting advanced rapidly throughout the Belt. The outturn is above earlier trade expectations. Demand was slow with buying limited. Flaxseed went up 5¢ at Minneapolis with trading on the light side.

	14% protein		1.90	-	-	-
Pacific Northwest	No. 2 Western White ...		1.50	-	-	1.16

1/ The export payment rate for wheat on October 15, was 24 ¢ per bushel for spring wheat from Duluth, 22 ¢ for soft red winter from Baltimore and hard winter from the Gulf, and 4 ¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25 ¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

				TOTAL 1/	10,710,120	3,119,480	4,006,150

1/ Wheat flour is equivalent to 24,633,276 bushels of wheat as grain; bulgur, to 6,117,000 bushels of wheat as grain; and corn meal, to 12,659,434 bushels of corn as grain.

In addition 837,130 cwt. of bulgur were sold for export under Title II of Public Law 480. This is equivalent to about 1,641,000 bushels of wheat.

October 23, 1964

WHEAT PRICES ADVANCE

Cash grain markets followed a mixed trend during the week ended October 22. Wheat, barley and flaxseed prices went up slightly while corn declined at most markets. Soybeans were on the weak side with increased harvesting.

Winter wheat gained 1-2¢ per bushel as export demand continued active and domestic interest was moderate. A Public Law 480 authorization to India for 1.2 million metric tons of wheat plus other heavy export sales provided strength to the market. Exporters were actively seeking supplies while farmers were holding tightly to stocks. Spring wheat went up 1¢ per bushel with cash demand good but selling at a slow pace. Announcement that CCC had halted sales of spring wheat for unrestricted domestic use provided additional strength. Durum prices were unchanged with most arrivals of low quality. In the Pacific Northwest white wheat went up 1¢ and hard winter 2¢ per bushel reflecting moderate trading and a somewhat broader demand. Rye closed about unchanged behind a narrow demand and light selling.

Corn prices were generally 1-2¢ per bushel lower as dry sunny weather over most of the Belt favored harvesting. Good export demand provided basic strength but marketing was heavy. Most of the arrivals were of good quality. White corn advanced 4¢ at Kansas City. Oats gained 1¢ at Chicago reflecting light receipts but dropped 3¢ at Minneapolis due to lagging demand. Barley strengthened with prices unchanged to as much as 6¢ higher for select malting types. Receipts remained light. Grain sorghum prices were 2¢ per cwt. higher at Ft. Worth due to improved demand for meager offerings but slanted lower at Kansas City as harvesting gained momentum in that area.

Soybeans declined 1¢ per bushel reflecting heavy receipts from new-crop harvest. Higher oil prices and good export demand for beans provided off-setting strength. Crushings of soybeans in September totaled 36 million bushels bringing the season's total to 441 million--nearly 34 million below the 1962-63 season's total. Flaxseed advanced 4¢ per bushel as crushers tried to draw out supplies from producers.

Special Features

	<u>Page</u>
Wheat - inspections for export by class and grade, July-September, 1963 and 1964	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Wheat - CCC-owned stocks by classes, September 30	6
Grains - U. S. stocks by position, October 1	7
Grains - CCC-owned stocks by States, September 30	8-10
Corn - quantity repaid, delivered, and outstanding under price support by States	11
Food for Peace Authorizations and Agreement	12

1964 WHEAT LOAN ... price support rates were increased in 10 major hard winter producing States to give farmers the benefit of rail freight reductions effective October 15. The increase in county price-support loan rates will range from 1 to 7¢ per bushel with an increase of 6¢ per bushel in most counties. The increase will take place in all counties of Oklahoma, Kansas and Texas; all except two counties in Nebraska; many counties in New Mexico, Wyoming, Missouri, Colorado and Arkansas and a few counties in South Dakota. The terminal rates for Omaha and Kansas City will not be changed.

Wheat: Inspections for export by class and grade, July-September, 1963 and 1964

Grains: Export prices basis prompt or 30-day shipment, October 22, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--					
Duluth	No. 1 Heavy Northern Spring, 14% protein	1.86	1.23	-	1.00
Baltimore	No. 2 Soft Red Winter	1.63	1.34	2.80	1.28
Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	1.85 1.92	1.32 -	2.83 -	2.14 -
Pacific Northwest	No. 2 Western White	1.52	-	-	1.17

1/ The export payment rate for wheat on October 22, was 26¢ per bushel for spring wheat from Duluth, 25¢ for soft red winter from Baltimore and hard winter from the Gulf, and 5¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Grain Market News

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

October 27, 1964

Volume 7 No. 4

Washington, D. C. 20250

Grain prices generally advanced during the July-October period with the October average showing a mixed trend compared with a year earlier. Wheat, rye and soybean prices the first three weeks of October averaged below a year ago while the other grains were higher. Record exports of corn and soybeans were strengthening factors. Corn and soybean carryover stocks were both above last year but below average. October 1 wheat stocks were the smallest for that date since 1957.

WHEAT ... prices at the principal Midwest markets advanced an average of 6¢ per bushel from July to October reflecting a good export demand and a tight holding policy on the part of producers. October prices of soft white wheat in the Pacific Northwest and durum wheat at Minneapolis were below the July average. At the third week of October, wheat prices ranged from 3¢ to 20¢ above the effective support level with the hard winter and spring wheat at the higher level in relation to support and soft red at the lower level. Stocks of wheat in all positions, October 1, totaled 1.8 billion bushels, 100 million less than a year earlier. Of these 953 million were either owned by Commodity Credit Corporation or under loan. Farmers put 122 million bushels of 1964-crop wheat under price support through September 30 -- 7 million more than last year. July-September exports of wheat and flour totaled 180 million, or 9 million more than a year ago. Wheat supplies in Canada for 1964-65 total about 1.1 billion bushels, a drop of 154 million from 1963-64. A record world wheat crop of 9 billion bushels for 1964-65 is 660 million more than the year before.

RYE ... prices during the first three weeks of October averaged 2¢ per bushel above July but 20¢ below October 1963. The lower prices reflect in part the larger supplies and the smaller disappearance. Stocks of rye on October 1 totaled 30 million compared with 23 million a year earlier. First quarter disappearance of a little below 10 million was 3 million less than last year. Exports of 1.3 million were down by 1 million bushels. Amount remaining for feed was also well below last year. Canadian supplies of rye for 1964-65 of nearly 20 million are well above recent years.

CORN ... generally advanced during the July-September quarter reflecting heavy exports and good domestic demand. Prices declined seasonally in October but generally averaged 3¢ per bushel above a year ago. The 1964 corn crop was forecast at 3,564 million bushels on October 1. If realized, this would be 13 percent below last year's record. Carryover stocks of old corn on October 1 totaled 1.5 billion bushels -- 164 million more than last year but 130 million below two years ago. Of the stocks this year, CCC either owned or had outstanding under loan 1.3 billion -- 110 million less than a year earlier. Disappearance of 3.9 billion bushels, last season was slightly below the previous year despite record exports and record wet process milling. Exports, of corn

grain only, totaled 478 million while wet milling totaled 195 million bushels. The quantity fed was 3.2 billion, a drop of 100 million from the previous season. Corn fed per animal unit totaled 18.8 bushels last season compared with 19.2 in 1962-63 and 18.4 the 1957-61 average.

OATS ... prices at Chicago and Minneapolis averaged 2¢ per bushel below a year earlier the first quarter of the season but in October were 1-2¢ higher. Oats stored in all positions on October 1 totaled 884 million bushels -- the smallest in the 20 years of record. July-September disappearance of 325 million was 14 million more than last year due to heavier feeding. Exports of 1.6 million were half those of a year ago and sharply below average. Canadian supplies of 533 million bushels for 1964-65 are 70 million below last season.

BARLEY ... prices at the farm averaged 3¢ per bushel above a year ago for the first quarter of the season. October barley prices on the West Coast were at about last year's level but were sharply above last year at Minneapolis. October 1 stocks, at 401 million were 6 percent less than a year ago. First quarter disappearance of 123 million was up slightly from last year reflecting increased feeding. Exports of 10 million were below last year while alcohol usage was about the same. Canadian barley supplies for 1964-65 totaled 282 million -- 28 million less than for 1963-64.

GRAIN SORGHUM ... prices at the farm for July-September averaged 5¢ per cwt. above a year ago. Market prices the first three weeks of October were 12¢ above last year. Supplies for 1964-65 total 636 million cwt. as against 693 million for 1963-64. The October forecast of 273 million cwt. is 54 million below the 1963 crop. Carryover stocks of 363 million cwt. were only slightly below last year. Disappearance of 330 million cwt. in 1963-64 compares with 289 million the previous season. Exports of 60 million were 3 million cwt. less than a year earlier.

SOYBEANS ... prices for July-September averaged 5¢ per bushel below a year ago due in part to larger supplies and smaller crushings. Prices the first three weeks of October were 3¢ below October 1963. Supplies of soybeans for 1964-65 total 730 million bushels on the basis of the October estimate of production and the carryover stocks. The 1964 crop of 699 million is down 1 percent from last year but October 1 stocks of 32 million were twice those of a year earlier. Crushings of 441 million bushels of soybeans last season were 34 million below the record of 1962-63. A record of 193 million bushels of soybeans were exported last season -- 13 million above 1962-63.

FLAXSEED ... prices at Minneapolis averaged 4¢ per bushel above a year ago the first quarter of the season and in October were 14¢ above last year. Stocks on October 1 of 33 million were 3 million below last year but 26 percent above average. First quarter crushings of 5.6 million and exports of 3.4 million were well above 1963 and the average.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks for 1963 and 1964 are preliminary. July-September 1964 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

GRAINS: MONTHLY AVERAGE CASH PRICES

1/ The total supply has not been adjusted for the quantity of new-crop soybeans crushed or exported in September.

2/ October 1 stocks in all positions include only old-crop soybeans.

3/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

4/ All off-farm storages not otherwise designated.

5/ Exports minus imports, which are negligible.

6/ Mostly quantity fed, but includes waste, loss, and statistical errors in estimates.

Grains: Quantity outstanding under support and owned by CCC compared with total stocks, October 1, 1964 and 1963
(Data in 1,000 bushels except grain sorghum in 1,000 cwt.)

Washington, D. C. 20250

CORN AND SOYBEANS LOWER

Cash grain markets were featured by sharply lower prices for corn and soybeans as marketing continued in full swing during the week ended October 29. Most other grains were unchanged to slightly lower. Flaxseed was independently higher.

Winter wheat prices closed on the weak side with prices fractionally to 2¢ per bushel lower. Demand was fairly good from both domestic and export buyers. Farm selling increased over the past few weeks but boxcar shortages hampered movement. Spring wheat declined 1¢ per bushel reflecting a somewhat easier market. Demand was fair but trading remained light. Demand for durum wheat improved with increased buying of the lower quality offerings. Prices at the lower end of the range gained 3¢ while the top end was steady. Wheat showed a mixed trend in the Pacific Northwest with white wheat up 3¢ reflecting an improved export demand while hard winter went down 3¢ per bushel due to the narrow export market. Rye dropped 4¢ per bushel reflecting a weaker Canadian market and a lack of export interest.

Corn prices declined 3-7¢ per bushel under impact of increased marketings of the new crop. Supplies were burdensome at Chicago where the price decline was the greatest. With excellent harvesting weather, the quality continued good. Demand was active with added support from exporters. Oats went down 1¢ reflecting the weaker corn market and no improvement in demand. Barley moved lower at Minneapolis with intermediates and lower types 4-6¢ lower. Prices held steady on the West Coast. Grain sorghum closed unchanged to 1¢ per cwt. lower with limited movement from increased harvest. Boxcar shortages delayed movement to ports.

Soybeans declined 6-8¢ per bushel reflecting heavy marketing and burdensome supplies. The heavy supplies more than offset continued good export movement and excellent processor demand. Oil and meal prices also were lower. Flaxseed advanced 4¢ per bushel at Minneapolis due to a fair demand for light receipts.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Oct. 1964	Sept. 1964	Aug. 1964	Oct. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	10.9	9.6	8.8	9.3
Value from bushel of soybeans <u>1</u> /	Dollars	1.20	1.06	0.97	1.02
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	69.30	69.80	64.90	73.80
Value from bushel of soybeans <u>1</u> /	Dollars	1.66	1.68	1.56	1.77
Value of oil and meal from bushel of soybeans <u>1</u> /	Dollars	2.86	2.74	2.53	2.79
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.67	2.61	2.48	2.68
Spread between soybean price and value of oil and meal	Cents	19	13	5	11

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. October 29, to 3:30 p.m., e.s.t. October 30, 1964.

Export Areas	WHEAT RATES (Cents per bushel)			FLOUR RATES
	Hard Red Spring	Hard Red Winter	Other Classes <u>1/</u>	(Cents per 100 lbs.) <u>2/</u>
Export Rate Period Thru April 15, 1965				
EAST COAST				
(Including St. Lawrence and Great Lakes ports)	25	25	25	171
GULF COAST	25	25	25	<u>3/</u> 173
WEST COAST	25	19	7	160

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excluding Durum wheat.

2/ This rate takes account of flour milled from wheat to which domestic marketing certificates apply.

3/ Includes Puerto Rico.

November 6, 1964

GRAIN MARKETS ADVANCE

Cash grain markets strengthened during the week ended November 5. Soybean prices led the advance with gains of 10¢ per bushel while other grains were moderately higher.

Hard winter wheat advanced 1¢ per bushel while soft red winter gained 2-3¢ reflecting primarily the continued good export demand. Domestic demand from flour millers and trade interests was steady. Offerings increased as farmers and country elevators were more willing to sell. Fall planted wheat throughout the Great Plains area generally need moisture. Spring wheat went up 2-3¢ reflecting improved demand and rather limited supplies. New flour business was slow but stocks were reported low. Durum wheat offerings were smaller and prices for the lower grades advanced about 3¢ per bushel. Wheat markets in the Pacific Northwest were firm with prices unchanged to 1¢ higher. Export demand continued good but growers remained slow sellers. Rye advanced 2¢ at Minneapolis. There was some improvement in demand although flour sales were still slow.

Corn markets strengthened due mainly to good export demand. Prices recovered most of last week's loss with gains of 5¢ at Chicago, 3-4¢ at Minneapolis and 1-2¢ at most other Midwest points. Although receipts continued heavy, demand was good for all offerings. Oats advanced 1¢ per bushel reflecting a fairly good demand for light offerings. Barley markets were mostly unchanged to slightly higher. Receipts were light and trading slow. Grain sorghum markets weakened at Kansas City as harvesting continued heavy. This weakness was in part offset by active buying by elevator interests.

Soybean prices advanced 10¢ per bushel, more than offsetting last week's loss. Strength stemmed from continued good export demand, heavy export loadings, higher oil prices and improved domestic interest. Harvesting was mainly completed in the principal Corn Belt area. Flaxseed prices held steady with receipts at Minneapolis sharply below a week ago.

Food for Peace Authorizations	2
Grains - export prices at specified points	2
Average prices, parity and support rates	6
Grains - U. S. imports, September	6
Corn, grain sorghum and soybeans - U. S. exports by country of destination, October-September 1963-64 and 1962-63	7
Grains - CCC dispositions	8

CORN EXPORTS ... last season totaled nearly 500 million bushels, including corn meal and other corn products in terms of grain. This is well above any other year and around 80 million more than in 1962-63. The largest customers for U. S. corn were United Kingdom and The Netherlands, each taking 85 million bushels. These totals include corn exported from Canadian ports. Japan imported 63 million bushels last season -- an increase of 26 million from 1962-63. Exports of grain sorghum in 1963-64 totaled 106 million bushels, a drop of 6 million from 1962-63. Japan and The Netherlands each imported over 30 million last season. Soybean exports last season reached a record 191 million bushels which was 11 million more than the previous high in 1962-63. Exports to Japan amounted to over 45 million while West Germany received 29 million and The Netherlands 27 million bushels. (Details p. 7)

Gulf	: No. 1 Hard Winter:	:		
	: Ordinary protein	: 1.86	1.34	2.82 2.12
	: 14% protein	: 1.93	-	-
Pacific Northwest	: No. 2 Western White ..	: 1.55	-	- 1.18

1/ The export payment rate for wheat on November 5 was 27¢ per bushel for spring wheat from Duluth, 26¢ for soft red winter from Baltimore and hard winter from the Gulf, and 8¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Washington, D. C. 20250

November 13, 1964

GRAIN MARKETS SLOW

Cash grain markets closed on a dull tone for the week ended November 12. Price changes were narrow, with the net difference generally limited to 1-2¢ from last week.

Winter wheat prices were unchanged to 1¢ higher reflecting mainly the good export demand and the continued tight holding policy at country points. Inquiry by mills was mostly for fill-in needs. Moisture reserves are unusually low with farmers hoping for general rains to provide fall growth and soil cover to prevent wind erosion during the winter season. Spring wheat declined 2¢ per bushel with most of the loss in the lower end of the range. Demand was slow both from domestic and export interests. Durum prices were unchanged with some improvement in sale of semolina and other products. White wheat dropped 1¢ per bushel in the Pacific Northwest while hard winter went up 1-2¢ influenced by strength in Eastern markets. Rye gained 1¢ with larger receipts moving well into commercial channels.

Corn markets showed a mixed trend with prices at Kansas City and Omaha 1¢ per bushel above a week ago reflecting good demand for moderate supplies. Prices at Chicago dropped 4¢ due in part to excess offerings. Export demand continued good. Picking made rapid progress over most areas with favorable harvesting weather. Oats held steady with little change in prices. Barley prices were 1-2¢ per bushel higher at most points with a generally good demand for light receipts. Grain sorghum prices followed a mixed trend with an improved demand at Kansas City. Increased new-crop offerings depressed prices at Ft. Worth.

Soybeans held on to last week's gain with little change in prices. Offerings decreased while higher oil prices more than offset a slight drop in meal. Exports continued at a high level with over 25 million shipped out in October. Crop prospects improved slightly during October with the bulk harvested. Flaxseed held steady with increased receipts.

Grains: Export prices basis prompt or 30-day shipment, November 12, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	: Wheat 1/ : Grade	: Price	: Corn : No. 2 : Yellow	: Soybeans: : No. 2 : Yellow	: Barley : or Grain : Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.86	1.22	-	1.00
Baltimore	No. 2 Soft Red Winter.	1.66	1.34	2.78	1.28
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.86 1.93	1.32 -	2.82 -	2.12 -
Pacific Northwest	No. 2 Western White	1.54	-	-	1.18

1/ The export payment rate for wheat on November 12 was 26 ¢ per bushel for spring wheat from Duluth, 26 ¢ for soft red winter from Baltimore and hard winter from the Gulf, and 8 ¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25 ¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

CORN AND SOYBEANS ADVANCE

Cash grain markets showed a somewhat mixed trend during the week ended November 19. Soybeans led the advance with more moderate gains posted for corn and other feed grains. Hard winter wheat strengthened while other wheats were lower. Rye and flaxseed also declined.

Hard winter wheat advanced 1¢ per bushel reflecting good mill demand and heavy export needs. Offerings from country points continued light. Beneficial rain and snow fell over much of the wheat belt, breaking drought conditions. Soft red winter declined 1-2¢ due to the light domestic interest and moderate export requirements. Spring wheat went down 1-2¢ per bushel with the biggest loss in higher protein types. Flour business continued slow but inventories were reported low. Durum wheat flour business was quiet with prices of ordinary durum down 2¢ per bushel. White wheat went up 1-2¢ in the Pacific Northwest as a result of limited producer selling and improved export demand. Rye declined 2¢ in a dull market as interest was very limited for light receipts.

Corn markets strengthened reflecting continued good export demand. Prices at most points advanced 1-3¢ per bushel but went up 6¢ at Chicago regaining the previous week's sharp loss. Dry corn was in strong demand with offerings light. Oats advanced 1¢ per bushel in light trading. Barley gained 1-2¢ with a broad demand for larger offerings. Grain sorghum prices went up 1-2¢ per cwt. due to moderate demand from smaller offerings.

Soybeans advanced 8¢ per bushel at Minneapolis and Illinois Points and 11¢ at Chicago. Strength stemmed from heavy export demand for both beans and the oil and meal. Processors continued to bid for dwindling country offerings. Flaxseed finished 5¢ lower in light trading and slow export interest.

* "NATIONAL FARM-CITY WEEK" *
* November 20-26 *

PRICE SUPPORT ACTIVITIES ... through October 31 show that farmers put 151.7 million bushels of 1964-crop wheat under price-support loans. This compares with 138.3 million bushels of 1963-crop wheat and 184.6 million bushels of 1962-crop wheat put under last year and the year before. Of the total put under, farmers had repaid loans on 7.3 million bushels. Under a new system of making advance application for total price support, effective with 1964 crops, farmers can estimate total eligible production upon which they might wish to seek price support prior to expiration dates for such action in 1965. These applications as of October 31 listed these cumulative quantities: Barley, 19,242,944 bushels; oats, 51,460,579; rye, 4,355,178; wheat, 234,270,216; flaxseed, 7,787,708; corn, 19,248,235; soybeans, 12,102,365 bushels; and grain sorghum, 26,366,490 cwt. (Details, 7-12).

SOYBEAN EXPORTS ... were at a record level of 40 million bushels October 1 through November 13 this year. This is 11 million more than in the same period last year. Corn exports in the first 6 weeks of the season totaled 61.5 million -- an increase of 3 million over last year. Wheat exports in the July-September quarter were higher than a year ago but since October exports of wheat as grain, totaled 71.5 million as against 93.3 million in the same period a year ago.

Grains: Export prices basis prompt or 30-day shipment, November 19, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley

^{1/} The export payment rate for wheat on November 19, was 25¢ per bushel for spring wheat from Duluth, 26¢ for soft red winter from Baltimore and hard winter from the Gulf, and 10¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Washington, D. C. 20250

November 27, 1964

GRAIN MARKETS ADVANCE

Cash grain markets continued strong during the holiday-shortened week ended November 25. Soybean prices led the advance with gains of 6¢ per bushel while most other grains were moderately higher.

Hard winter wheat prices advanced 1¢ per bushel while soft red winter was unchanged to 1¢ higher. Exporters were seeking supplies on the open market while mill demand was less active. No increase in farm selling was apparent since the rather general rains of a week ago. Offerings of soft red winter wheat continued light. Spring wheat gained 1¢ per bushel with a steady demand for moderate offerings. Durum wheat was draggy with bids for some of the intermediate grades lowered 3¢ per bushel. White wheat was about unchanged in slow trading with small export sales and light demand from flour mills. Rye declined 3¢ as flour business remained quiet and export outlets were narrow.

Corn prices advanced 1-2¢ per bushel reflecting good export and domestic outlets. Colder weather provided additional interest and slowed movement somewhat. Oats went up 1¢ as buyers competed for smaller offerings. Higher millfeeds made oats look more attractive. Barley was unchanged to 2¢ lower at Minneapolis with continued large receipts, but advanced 1¢ at Portland under additional export interest. Grain sorghum prices were 1¢ per cwt. higher due mainly to light offerings.

Soybean prices continued to advance with gains of 6¢ per bushel at most points. The record crush in October and continued heavy export movement provided strength. A continued strong oil market was also a factor. Offerings from the country continued light. Flaxseed held steady at Minneapolis. Trading continued light.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, October	6-7
Grains - inspected receipts at selected markets, October	8-9
Soybean prices compared with soybean oil and meal prices	10
Soybeans and flaxseed - supply and distribution, monthly	10
Corn and soybeans - imports into Canada, 1961-64	11
Soybeans - quantity processed at mills, United States, 1959-64	11
Food for Peace Authorizations	12

SOYBEAN CRUSHINGS AND EXPORTS ... were at a record level in October. Crushers processed 44.3 million bushels in October as against 40.5 million in October 1963. October exports of 25 million were 5 million more than a year earlier. Reflecting the larger carryover stocks, supplies of soybeans for 1964-65 are 2 percent above 1963-64. Supplies of soybeans remaining on November 1 for processing, export or carryover totaled 615 million bushels this year as against 604 million last year. Crushers processed 7.9 million bushels of flaxseed July through October this season, an increase of 2.4 million over the same months last season. Exports in the first four months of 4.3 million were more than double a year ago. Supplies of flaxseed remaining on November 1 this year totaled 25.5 million bushels as against 28.8 million last year.

Grains: Export prices basis prompt or 30-day shipment, November 25, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Price	Corn	Soybeans	Barley
			No. 2	No. 2	or Grain
	Grade		Yellow	Yellow	Sorghum ^{2/}
--Dollars--					
Duluth	No. 1 Heavy Northern				
	pring, 14% protein.	1.88	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.65	1.37	2.91	1.28
Gulf	No. 1 Hard Winter:				
	Ordinary protein ...	1.87	1.35	2.97	2.16
	14% protein	1.94	-	-	-
Pacific Northwest	No. 2 Western White ..	1.54	-	-	1.20

^{1/} The export payment rate for wheat on November 25, was 27¢ per bushel for spring wheat from Duluth, 27¢ for soft red winter from Baltimore and hard winter from the Gulf, and 9¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

4/ Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Nov. 1964	Oct. 1964	Sept. 1964	Nov. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	11.9	10.9	9.6	9.1
Value from bushel of soybeans <u>1/</u>	Dollars	1.31	1.20	1.06	1.00
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	65.55	69.20	69.80	74.70
Value from bushel of soybeans <u>1/</u>	Dollars	1.57	1.66	1.68	1.79
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.88	2.86	2.74	2.79
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.72	2.67	2.61	2.72
Spread between soybean price and value of oil and meal	Cents	16	19	13	7

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

December 4, 1964

GRAIN MARKETS DISPLAY MIXED TREND

Cash grain markets showed a mixed trend for the week ended December 3. Net changes, however, generally ran no more than 2 or 3¢ per bushel above or below the previous week's close.

Winter wheat finished on the lower side with prices down 1-3¢ per bushel. Selling by farmers continued light. Domestic mills provided only fair demand for hard wheat, while export interest slacked off. Soft red wheat, on the other hand, enjoyed fairly good demand for limited offerings. Spring wheat held mostly steady but the high proteins were down 1-2¢ at Minneapolis. Durum ruled unchanged to 3¢ lower. Flour business remained quiet and buyers did not show too much interest in spring wheat. White wheat closed on a weak note despite improved export selling in the Pacific Northwest. Hard winter wheat, however, looked firm with improved mill interest and tight country offerings. Rye edged up a penny at Minneapolis.

Corn prices closed unchanged to 3¢ per bushel higher, reflecting a slight tapering off in receipts and better demand from feeding interests. Oats ruled about steady in slow trading. Barley held generally steady, with maltsters providing the main support at Minneapolis. Grain sorghum went up 2¢ behind improved demand at Ft. Worth but turned to the weak side as demand slowed a little at Kansas City.

Soybeans closed unchanged to 4¢ per bushel higher. Strength stemmed from good demand, late improvement in oil and meal markets, and favorable export figures. Flaxseed held steady in a quiet market at Minneapolis.

OFFERS TO PROCESS BULGUR ... from privately-owned hard red winter or hard red spring wheat, were requested December 3. Of the total quantity requested for sale to CCC, 64,477,808 pounds are for foreign donation and 450,048 pounds for domestic school lunch program and welfare outlets. This request for bids continues the purchase program announced February 21, 1963, under which bulgur is being obtained for both domestic and foreign donation. So far, a total of 978,913,347 pounds have been obtained for domestic and foreign donation through 18 previous purchases under this program, and under a processing program recently discontinued. Approximately 18.7 million bushels of wheat have been required to process the bulgur donated thus far under these two programs. Bulgur is processed by boiling wheat, drying it, removing some of the bran, and cracking the grain into meal.

GRAIN EXPORTS ... in October were at a record level for corn and soybeans while incomplete data for November indicate a continued record movement. Corn exports in October, according to the Bureau of the Census, totaled 44 million bushels -- 10 million above a year ago. November exports, on the basis of inspections for export, total around 56 million -- a little above the same month in 1963. Nearly 30 million bushels of soybeans were exported in October -- also 10 million above last year's October exports. November exports are indicated at 30 million, about 9 million above the comparable month a year ago. Wheat and flour exports totaled around 303 million bushels, July through November, a drop of around 10 million from the same months of 1963. Flour exports for the four months, July-October, were 6 million above last year.

Grains: Export prices basis prompt or 30-day shipment, December 3, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Grade	Price	Corn : No. 2 : Yellow	Soybeans : No. 2 : Yellow	Barley : or Grain : Sorghum <u>2/</u>
--Dollars--						
Duluth	No. 1 Heavy Northern	Spring, 14% protein.	1.88	-	-	-
Baltimore	No. 2 Soft Red Winter.		1.65	1.39	2.92	1.30
Gulf	No. 1 Hard Winter:					
	Ordinary protein ...	14% protein	1.87	1.37	2.98	2.19
			1.94	-	-	-
Pacific Northwest	No. 2 Western White		1.53	-	-	1.19

1/ The export payment rate for wheat on December 3, was 27¢ per bushel for spring wheat from Duluth, 27¢ for soft red winter from Baltimore and hard winter from the Gulf, and 9¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Duluth and Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of October 31, 1964, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,773,360,257. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$25,085,532. These sales left a combined feed grain certificate value of \$1,877,488,430 as of November 27, 1964.

MIXED TREND RULES GRAIN MARKET

Cash grain prices continued to show a mixed trend during the week ended December 10. Soybean prices lost ground, and wheat markets softened. Other grains finished unchanged to higher, with corn leading the upswing. Trading slowed as many markets began to show signs of pre-holiday dullness.

Winter wheat closed on the soft side. Offerings were light, and most traders did not expect selling by farmers to improve much until after the turn of the year. Domestic demand was dulled by tax considerations, while export demand was tempered by the possibility of a dock strike. Spring wheat found good demand but buyers had lower ideas and prices turned unevenly 1-5¢ per bushel lower at Minneapolis. Durum sold well, too, but at steady to 2¢ lower prices. White wheat held firm but hard wheat lost 2-3¢ in the Pacific Northwest. Rye held steady in Minneapolis where the market was dull with little export interest and quiet flour business.

Cash corn finished unchanged to 6¢ per bushel higher as lighter offerings failed to satisfy a fairly strong demand. Colder weather and increased feeding helped boost inquiry for corn. Oats moved up 1-3¢, reflecting better demand and general strength in feed grains. Barley ruled unchanged to 4¢ higher largely as a result of lighter offerings. Grain sorghum markets held firm supported mainly by good feed demand.

Soybeans lost 4-5¢ per bushel at Chicago and 2¢ at Minneapolis. Cash soybeans closely followed and were very sensitive to influences on the futures market. Buyers were encouraged by the rate of export inspections and crushing, but also were discouraged by the possible rail and dock strikes. Some interests were awaiting the final crop reporting in order to more accurately analyze the supply picture. Flaxseed held steady in dull trading at Minneapolis.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 12 No. 51 Washington, D. C. 20250 December 18, 1964

GRAIN MARKETS SHOW LITTLE CHANGE

Cash grain prices showed only minor changes in relatively quiet trading during the week ended December 17.

Winter wheat declined 2-3¢ per bushel in the Southwest but ruled 1-3¢ higher elsewhere. Trading was on the light side as both domestic mills and exporters showed little buying interest. Country selling remained slow in the Texas area but picked up in the Kansas City market area. Spring and durum wheat found prices about steady at Minneapolis. Small offerings met a fairly good buying interest, but demand did not appear urgent. Wheat prices softened behind light demand for limited offerings in the Pacific Northwest. Rye was about unchanged at Minneapolis where flour trade was slow and statistical news was considered disappointing by some traders.

Corn finished on a firm note, with prices unchanged to mostly 2¢ per bushel higher. Slow country marketings met continued good demand, but most support stemmed from the onslaught of bitter and cold winter weather over a large part of the Midwest. Oats showed a tinge of strength. Barley prices weakened a couple of cents as the market entered the pre-holiday period. Demand was fair but buyers became a little more selective. Grain sorghum prices held steady with offerings about in line with good demand.

Soybeans finished 1-2¢ per bushel higher after following the up and down course of the futures market most of the week. Record export inspections last week proved a stimulating influence, but the majority of traders showed more interest in the outcome of the final crop production report. Flaxseed held steady at Minneapolis.

No report December 25, 1964 - Next issue December 31, 1964

PROPOSED REVISION IN OFFICIAL U.S. STANDARDS FOR WHEAT ... would increase the percentage of "contrasting classes" permitted in grades No. 1, No. 2, and No. 3. The proposed change, published in the Federal Register on December 15, would increase the percentage of contrasting classes allowed as follows: Grade No. 1 -- from 1/2 percent to 1 percent; grade No. 2 -- from 1 to 2 percent; and grade No. 3 -- from 2 to 3 percent. The proposed changes, which would be less restrictive on the grading factor, contrasting classes, are being considered at the request of wheat growers, grain elevator operators, and exporters in the Pacific Northwest.

PRICE SUPPORT ACTIVITIES THROUGH NOVEMBER ... showed that farmers had put 159 million bushels of 1964-crop wheat under price support loans. This is about 15.6 million bushels more than the quantity which had been put under support as of the same time a year earlier. Of the 159 million bushels of wheat put under loan, repayments had been made on 17.2 million bushels. Nearly 15.5 million bushels of 1964-crop soybeans also had been put under loan through November. This is well below the 35.8 million bushels of 1963-crop soybeans put under loan on the same date last year. Farmers also had put more corn, oats, and rye under support than a year ago but less barley, flaxseed, and grain sorghum. (See price support details on pages 8-12.)

DETAILS OF 1965 FEED GRAIN PROGRAM ... were announced this week. They covered major provisions of the voluntary 1965 feed grain program, including the decision to keep total-price support levels for cooperators the same as for 1964. Within the total price-support rates, loan levels were decreased with corresponding increases in payment rates. Diversion payment rates will be the same as for 1964. Total national average price support for cooperators for 1965-crop corn will be \$1.25 per bushel -- composed of a loan and purchase value of \$1.05 per bushel and a 20¢ per bushel support payment based on normal (1959-63) production of the acreage planted for harvest. Other feed grain price supports are adjusted according to their relationship to corn. Total support price for barley is 96¢ per bushel -- an 80¢ loan rate and a 16¢ support payment. The total price support for grain sorghum is \$2.00 per cwt. -- a \$1.65 loan rate and 35¢ support payment. Details of the voluntary 1965 feed grain program also included acreage diversion provisions and payments in kind for both diversion and price-support payments.

REVISED TERMS OF EXPORT PAYMENT-IN-KIND CERTIFICATE REDEMPTIONS ... announced this week provide greater flexibility for redemption of payment-in-kind certificates issued under certain export and purchase programs. Under the new arrangements, an Export Commodity Certificate which will be issued by CCC will be redeemable in any CCC-owned commodity, and tobacco under loan, offered for sale under a regulation or announcement issued by CCC providing for redemption of such certificates. All commodities received through redemption of such certificates must be exported in accordance with terms and conditions of sales programs under which the commodity is acquired. These new certificates will be redeemable by CCC in eligible commodities at face value for a period of one year from the date of issuance. Revisions will not apply to payment-in-kind certificates issued under contracts made by CCC prior to issuance of the applicable program announcement or amendment. Neither will they apply to certificates issued under the wheat and feed grain diversion and price-support program, the cotton equilization program, or the cotton domestic allotment program.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ Chicago. 2/ Duluth. 3/ Superior. 4/ Toledo. 5/ Carrollton. 6/ No. Charleston. 7/ Port Allen.

Based on weekly reports of inspections by licensed grain inspectors.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. December 17, to 3:30 p.m., e.s.t. December 18, 1964.

Export Areas	WHEAT RATES (Cents per bushel) <u>1/</u>			FLOUR RATES	
	Hard Red Spring	Hard Red Winter	Other Classes <u>2/</u>	(Cents per 100 lbs.) <u>3/</u>	
	Export rate period				
	Thru August 13, 1965	Thru May 25, 1965			
EAST COAST (Including St. Lawrence and Great Lakes ports)	22	24	24	163	
GULF COAST	29	24	24	<u>4/</u> 174	
WEST COAST ;	22	16	14	158	

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

1/ These rates payable under GR-345 only on wheat for which export wheat marketing certificates are acquired and surrendered to CCC.

2/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excludes Durum wheat.

3/ This rate payable only on flour milled from wheat to which domestic marketing certificates apply.

4/ Includes Puerto Rico.

Grains Export prices basis prompt or 30-day shipment, December 17, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
-- Dollars --					
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.84	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.69	1.41	2.92	1.34
Gulf	No. 1 Hard Winter: Ordinary protein ... 14% protein	1.84 1.91	1.39 -	2.98 -	2.22 -
Pacific Northwest	No. 2 Western White ...	1.53	-	-	1.20

1/ The export payment rate for wheat on December 17, was 22 ¢ per bushel for spring wheat from Duluth, 24 ¢ for soft red winter from Baltimore and hard winter from the Gulf, and 14 ¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25 ¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

United States Wheat: Supply and Distribution

Item	1964-65	1963-64	1958-62 Average
--Million bushels--			
Carryover stocks, July 1	900.9	1,194.9	1,244.6
Production	1,286.0	1,137.6	1,252.8

SOYBEANS SHARPLY LOWER - OTHER GRAINS SHOW MINOR CHANGE

Cash grain prices generally showed only minor changes in relatively quiet trading in the holiday-shortened week ended December 30. Soybeans proved the exception as prices broke sharply in the last two days.

Hard winter wheat finished about unchanged with a rather weak undertone. Export demand was slow, but there was some increased selling by farmers and country elevators. Soft red winter was easy with prices unchanged to 2¢ per bushel lower. A 1965 winter wheat crop of 1,042 million bushels was indicated by December 1 conditions, the Crop Reporting Board reported. This is 2 percent above the 1964 crop and 8 percent above the 1959-63 average. Spring wheat advanced 1¢ as mills provided good outlets for the rather small offerings. Durum wheat was steady in light trading. Wheat markets weakened in the Pacific Northwest with only limited interest, and prices were unchanged to 1¢ lower. Rye went up 2¢ in very light trading and small receipts.

Corn markets held fairly steady during the week with prices unchanged to 1¢ per bushel higher. Both export and domestic demand provided ready outlets for all offerings. The oats market was firmer with prices 1-2¢ higher reflecting light receipts. The barley market was mostly unchanged. Grain sorghum prices were easy with demand from feeding areas limited by heavier sales.

Soybean prices declined 10¢ per bushel reflecting in part an adjustment to the sharp advance of previous weeks, profit-taking in futures trading, a drop in exports, and expectation of increased marketings after January 1. Flaxseed held steady with buying interest only fair at Minneapolis.

1965 PRICE SUPPORT RATES ANNOUNCED: The national average price support rate or the 1965 soybean crop will be \$2.25 per bushel, the same as the rate for the 1964 crop. A flaxseed rate of \$2.90 per bushel for the 1965 crop was also announced which is unchanged from the 1964 rate. The national average price support loan rate will be 60¢ per bushel for oats and \$1.02 for rye. This compares with the 1964 loan rate of 65¢ per bushel for oats and \$1.07 for rye. As in previous years, price support will be carried out through loans and purchases on farm-stored and warehouse-stored grain. Applications for price support will be available through January 31, 1966. Loans for oats and rye will mature April 30, 1966, for soybeans on July 31, 1966 and for flaxseed on January 31, 1966 in Arizona and California and May 31, 1966 in all other States.

SOYBEAN SUPPLIES ... on December 1 remaining for export, processing or carry-over totaled 535 million bushels -- 8 million below a year ago. The smaller supplies reflect the heavier disappearance since beginning supplies on October 1 were 17 million more than last year. Crushing of soybeans during October and November totaled 88 million, an increase of 8 million over the year before. Exports of nearly 60 million were 18 million more than for the same months of 1963. Flaxseed supplies on December 1 totaled 19 million bushels, a drop of 7 million below a year ago. Crushing and exports, July through November, amounted to 15.7 million bushels or about 6 million more than the same months of 1963.

CCC EXPORT CREDIT SALES PROGRAM ... has been revised to provide deferred payment terms in connection with certain agricultural commodities exported from private stocks. Private stocks now eligible for export credit include wheat, wheat flour, bulgur, corn, cornmeal, barley, oats, rye, grain sorghums, & soybean oil.

Grains: Export prices basis prompt or 30-day shipment, December 30, 1964
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow :or Grain Sorghum 2/
-- Dollars --				
Duluth	No. 1 Heavy Northern : Spring, 14% protein. :	1.87	-	-
Baltimore	No. 2 Soft Red Winter.:	1.69	1.42	2.94 1.30
Gulf	No. 1 Hard Winter: Ordinary protein ...: 14% protein:	1.80 1.87	1.39 -	2.92 - 2.20
Pacific Northwest	No. 2 Western White ...:	1.52	-	- 1.20

1/ The export payment rate for wheat on December 30, was 25¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore and hard winter from the Gulf, and 13¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Dec. 1964	Nov. 1964	Oct. 1964	Dec. 1963
Soybean Oil:					
Average price at crushing plant	Cents per lb.	12.0	12.0	10.9	8.2
Value from bushel of soybeans 1/	Dollars	1.32	1.32	1.20	.90
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	68.00	65.65	69.20	77.25
Value from bushel of soybeans 1/	Dollars	1.63	1.58	1.66	1.85
Value of oil and meal from bushel of soybeans 1/	Dollars	2.95	2.90	2.86	2.75
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.84	2.74	2.67	2.71
Spread between soybean price and value of oil and meal	Cents	11	16	19	4

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Oct. 1		Year beginning July 1	
	1964-65	1963-64	1964-65	1963-64
	--1,000 bushels--			
Carryover	31,991	15,055	13,141	8,388
Production	699,882	699,363	24,408	31,151
Total supply 1/	731,873	714,418	37,549	39,539
Disappearance through November 30:				
Seed, feed and residual for season:	49,000	50,411	2,500	3,400
Crushed for oil or processed	87,977	79,933	9,689	7,293
Exported	2/ 59,507	41,048	2/ 5,983	2,422
Total disappearance	196,484	171,392	18,172	13,115
Balance on December 1 for processing, export or carryover	535,389	543,026	19,377	26,424

1/ The total supply has not been adjusted for the quantity of new-crop soybeans crushed or exported in September.

2/ Partly estimated.
